Many Pennsylvania communities, including the Dallas area, are facing an unusual drought situation. United Water's Dallas supply has dropped to a historic low as rainfall levels are well below normal. Recharging of groundwater supplies has been minimal, and stream flows remain very low.

United Water Pennsylvania reminds customers that a drought warning is in effect and water conservation is necessary. The company urges customers to reduce your water usage by 10 to 15 percent, by using the water conservation measures listed below. They not only protect the water supply but also can save money.

- Do not wash automobiles or sprinkle lawns.
 - Use dishwashers and automatic clothes washers only with full loads and adjust water levels to the minimum amount required to accomplish the task.
 - Repair all leaking faucets, toilets, etc.
 - Take short showers instead of baths and turn off water when lathering.
 - Do not leave the water run when brushing teeth, shaving, etc.
 - Reduce the number of toilet flushes per day and/or install toilet tank displacement inserts. Each flush uses 1 1/2 to 5 gallons per flushing, depending on the type of toilet.
 - Use sink and tub stoppers to avoid wasting water.
 - Be mindful of water usage related to pools and "slip and slides," etc.
 - If possible, read your water meter daily to determine your water usage.
- If voluntary conservation does not reduce demands and the drought conditions continue, mandatory restrictions could be put in place, in which consumption would be restricted to 40 gallons per day for each resident of each household. (The average person uses 60 gallons per day.) Thank you for your cooperation. If you have any questions, please call us toll free at 888-299-8972, 8 a.m. to 4:30 p.m. Monday through Friday.
