they make

They make the future.

They make RCN's Megaband™ Network.

6,412 fiber-optic miles have been in their hands,
and they know the power, the capacity, the potential.
It is more than just phone, cable and Internet. It is
everything that hasn't even been invented yet.
It will change the world.

They made history.

They are RCN's 6,305 employees.

They've doubled in number this year alone,
and it shows. On the 3rd of June, in Chicago, their
network passed a record-breaking one millionth home.
And they're not about to slow down now.

They are the center of everything we do.

Phone. Cable. High-Speed Internet.
