Firefighters prepare gift for NYC brothers

G*Fund* proceeds, Blaque will be delivered soon

> By M.B. GILLIGAN ost Corresponder

DALLAS TWP. - Local firefighters are showing solidarity th their counterparts in New York City who were devastated by the Sept. 11 attack on the World Trade Center.

The Back Mountain Firemen's Association (BMFA) recently unveiled a plaque they prepared for the New York City Fire Department. The plaque lists the names and department numbers of the 15 local companies that are members of the associion. It also contains a poem entitled "The Final Call," written by Frank Lutinski of Harveys Lake.

"I wrote this poem a few years ago and had it copyrighted in 1995," said Lutinski, vice-president of the Firemen's Association. "I adapted it a little bit for use on this plaque for the New ork Fire Department."

The local companies decided in October to start a fund for the New York firefighters. "We have a few thousand dollars in it now," said Jack Dodson, association president. "We'd really like to add to it before the presentation."

School districts face hike in pension costs

By ELIZABETH ANDERSON Post Correspondent

BACK MOUNTAIN - First, there was a rash of tax reassessments, causing financial woes for area school districts. Now due to an increase in school employees' pension rates and the downturn in the stock market, districts are facing large and unexpected contributions to the Public School Employees Retirement System Fund for the 2002-2003 fiscal year.

Dallas and Lake-Lehman school districts are being asked to pay \$240,000 and \$270,000, respectively, to the retirement fund and may have to scramble to find the funds. Neither district will know the final damage until budget time comes around in the spring.

"It would depend on how fiscally prudent we are and where some of the dollars are coming from to offset this," said Dr.

Gilbert Griffiths, superintendent of Dallas School District.

Last year the employer contribution rate was 1.09 percent; for this fiscal year it is 5.64 percent of the salary budget. According to Kathleen Williams, business manager at Lake-Lehman School District, the district owed \$132,314 for the 2001-2002 fiscal year, with the Commonwealth picking up half that tab at \$66,110. This year, at the higher rate, the Lake-Lehman district will be paying an estimated \$271,450 of \$542,900. "This is an increase of over \$200,000 to the district," Williams said.

The employer contribution rate had been steadily decreasing over the last decade, from a rate of 19.68 percent in 1990, due to the healthy economy and the strength of the stock market. However, with the downturn

Volunteers always welcome

By M.B. GILLIGAN Post Corresponden

DALLAS TWP. - The New ork tragedy of September 11 didn't help to swell the ranks of volunteers for 15 local fire and ambulance companies. Each and every one of the local members present at a recent plaque unveiling ceremony expressed the need for more volunteers who are willing to work.

"There is always a place for everyone," said Jack Dodson, resident of the Back Mountain remen's Association. "No matter how young or old or whether male or female, there is a job for them to do.

Fire and ambulance companies always need trained personnel to man the equipment and to answer emergency calls. But, in addition to those wellknown duties, they need help th fund-raising and organiza-

Larry Pedersen displays some of the plants he has found in Central

America. The chemistry professor spends his summers scouring

tropical forests in search of new medicines.

Misericordia prof seeks cures in tropical forests

By MONIQUE SIMPSON Special to the Post

DALLAS - Movies have always had powerful impacts on viewers.

Some weep sentimental tears and some chuckle uncontrollably, but few travel to tropical jungles to find medical cures upon returning from the cinema.

Professor Larry Pedersen is among the latter.

After watching Sean Connery scour the Brazilian rain forest for a cancer cure in "Medicine Man," the College Misericordia chemistry professor set out to find cures in the Central American forests.

"I said, 'Hey, I want to do that.'

His first step was building on his botanical knowledge by enrolling in a tropical plant ecology course in Costa Rica. But two weeks before it was scheduled to start, the teacher backed out and the class was canceled.

"I'll teach the course," Pedersen half-jokingly told the

school's administration. A few days later, he was offered the position.

With the help of a native teaching assistant, he spent the summer of 1999 teaching plant identification to five international students at La Suerte Biological Field Station, a private station northeast of San Jose.

One of the more adventurous aspects of the summer was conducting field research in the neotropical rain forest. Unlike the local people, the 55-year-old chemist was unable to knock down small tree branches with a sling shot and had to rope-climb trees to examine the vegetation.

After finishing the course, Pedersen traveled to Ometepe Island in Lake Nicaragua. Because of past political problems, he said little research has been done in the area and there are many unexplored botanical opportunities.

Now he is focusing his research on Ometepe's ecology. During the past two summers,
