

Brad Lothridge, Shavertown, shoveled his 120 foot drive way, and then shoveled some more. "It's a long drive way. I just do a little stop, a little stop."

Snow scenes around the Back Mountain

Sure, this guy thought it was all great fun. At Hoss's Garden Hut, Dallas Township.

DALLAS POST STAFF PHOTOS

Do you think they would have moved if it wasn't President's Day?

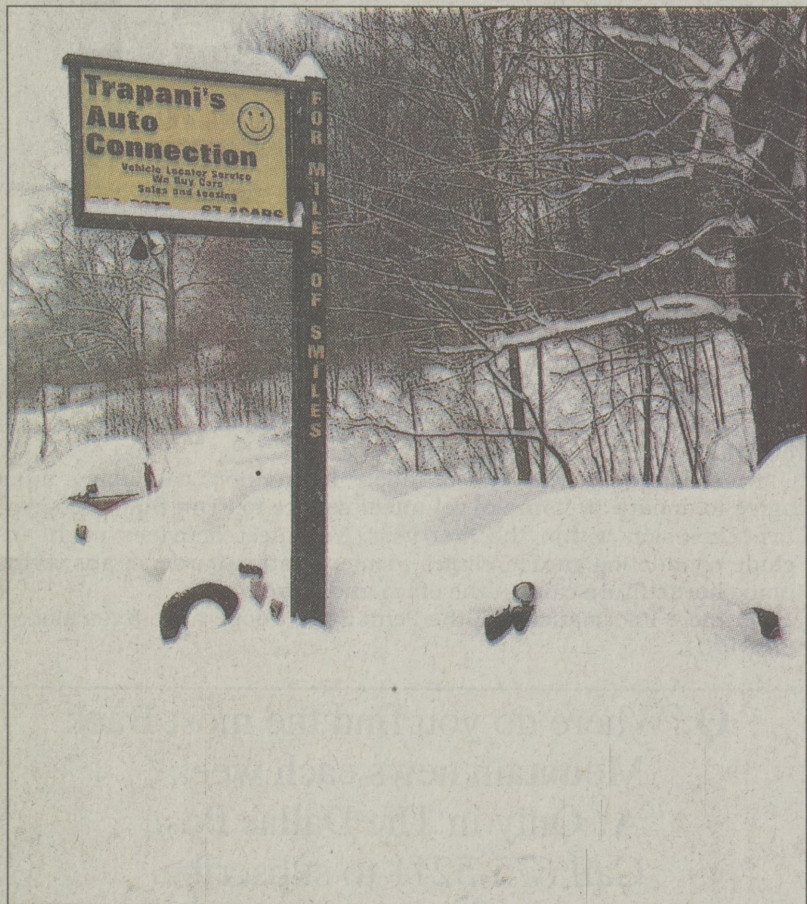

A lone mini-van navigated Route 309 at the height of the storm.

Dan Major cleared the sidewalk at the Back Mountain Memorial Library.

Snowy sign in Dallas.

It was a slow day on local used car lots.

Alex Harding let a shovelful of snow fly as the snowblower stood by.

Dan Zamboni, Shavertown, spent Monday evening snow blowing his drive way.

ARE YOU A VICTIM OF AN AUTO ACCIDENT?

■ **SYMPTOMS NOT ALWAYS OBVIOUS.**
 The most obvious symptom of whiplash is neck and shoulder pain. But beware of symptoms you may not relate to the whiplash injury:
 • HEADACHES • DIZZINESS • STIFFNESS • NAUSEA • NUMBNESS
 • WEAKNESS • SWELLING • BACK/CHEST PAIN • BLURRED VISION

■ **TELL-TALE SIGNS.**
 Many times a whiplash injury may take hours, weeks, months or even years before symptoms are noticed. This is due, in part, to the bleeding and formation of scar tissue that occurs around the injured area. In some cases, whiplash pain can appear at the time of injury and then decrease over time. Severe symptoms can occur later when excessive stress is placed on the spine, signaling an untreated whiplash injury.

■ **PROPER CARE IS NO ACCIDENT.**
 Unfortunately, whiplash injuries do not heal themselves. An untreated whiplash injury can lead to disc degeneration and arthritis. Getting immediate, proper care can help you avoid serious problems later. Dr. John Alaimo has treated many whiplash victims through careful evaluation and gentle, safe chiropractic adjustments, combined with advanced therapeutic techniques.

If you've been injured, or have whiplash symptoms, call the Clinic for a free consultation and exam.
