STRANGE BUT TRUE

 At one time, it was common for someone to be able to read but not be able to write. Writing was a highly specialized skill not commonly acquired by the masses.

• It is reputed that Queen Elizabeth I bathed only twice a year.

• Everyone knows that Alexander Graham Bell invented the telephone - he received patent No. 174,465 for it, in fact. Most people don't realize, though, that if it weren't for a small matter of timing, Elisha Gray would have been the one put in all the history books. The electrician from Chicago invented what was, essentially, the same device, and he also applied for a patent. Unfortunately - Gray, anyway - Bell beat him to the punch by a mere two hours.

New Hampshire has a total coastline of only 13 miles.

• If a guy has been to Bangor, Norfolk, Newark, New Haven, Phoenix, Stamford, Atlanta, Dayton, Cleveland, Philadelphia and Jacksonville, you'd think he was pretty well-traveled, wouldn't you? Maybe not; those are all names of towns in New York state.

• It was Ambrose Bierce who defined a bride as "a woman with a fine prospect of happiness behind her."

• Psychologists claim that if you don't like children, it's probably because you were abused or neglected when you were growing up.
