### PET/CT

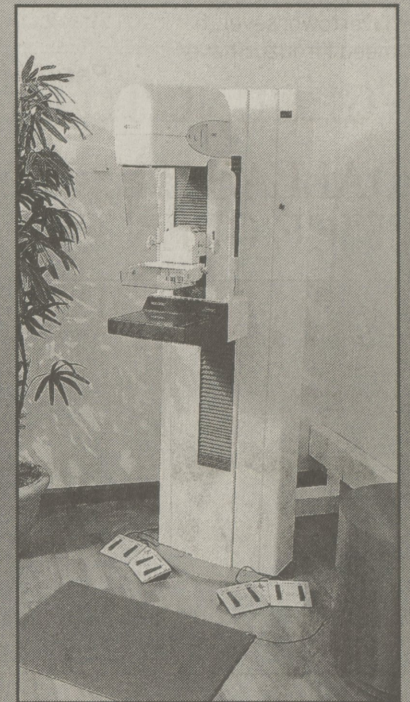

Vision Imaging of Kingston is one of the only imaging centers in our area to have a permanent PET/CT. This machine fuses the PET (which shows metabolism and function of cells) and CT (which shows detailed anatomy) images and fuses them together. The combination PET/CT scan gives doctors a powerful new system for detecting and diagnosing conditions like cancer earlier and more accurately, increasing the patient's chances of a good outcome.

X-Ray • MRI (Open and Closed)  
Multi-Slice CT • PET/CT • Ultrasound • Nuclear Medicine  
Digital Mammography • Bone Densitometry

We accept the following insurances:

- Aetna • AmeriHealth Mercy • Black Lung • Blue Cross/Blue Shield
- Champus/Tricare • Cigna • Devon
- First Priority (MRI, Nuclear Medicine, PET/CT, DEXA only)
- Geisinger Health Plan • Health America • Intergroup • Medicare
- Medical Assistance • Medplus/Unison • One Call Medical
- One Call Medical • PHCS • Railroad Medicare
- United Healthcare • Valley Preferred

### Digital Mammography

The Dr. Thomas F. Bednarek Women's Diagnostic Imaging Center housed here at Vision Imaging of Kingston offers Digital Mammography to their patients. This is one of the newest advances in mammography which results in shorter examination times and significantly improved patient convenience and comfort. Digital Mammography is especially helpful to women with dense breasts or breast implants.

At Vision Imaging of Kingston the Radiologist will view current films and compare any other previous films for a diagnosis. Dr. Lafond or Dr. Bednarek will meet with the patient and discuss the results. No more worrying and waiting for a letter in the mail. All of our patients will know the results before they leave Vision Imaging.
