Proof that the laws of physics are actually just loose suggestions.

The entirely new Audi A4. Progress is beautiful. At first glance, the stat sheet on our entirely new A4 doesn't make much sense. Usually, cars that are bigger don't go faster (see the new 2.0 TFSI™ engine). And cars that are both bigger and faster almost never consume less gas. And yet, somehow, the new Audi A4 is all three – bigger, faster and more fuel-efficient. A combination that probably doesn't sit well with our German-engineered competition. To experience this automotive enigma for yourself, visit an Audi dealer today and test drive the bigger, faster and, yes, more fuel-efficient Audi A4. Audi. Truth in Engineering.
