# Rotary Club decorates triangle

SUBMITTED PHOTO

Neither rain, nor snow, nor temperatures low can deter the members of the Rotary Club of Dallas from decorating the triangle at the Route 309/415 intersection in Dallas. Although it was only 22 degrees on Saturday, Nov. 22, 10 hearty members of the club stood out in the cold to be sure that, as your family and friends come to your house for the holidays, they will be welcomed with a wish for a happy holiday season. Decorators are, from left, Gary Booth, Art Peoples, Ron Fitch, Jim Alexander, Dan Jones, Todd Buckley, Melissa Saxon, Bill Nafus, Jerry Reisch and Joe Stager.

Dr. Anthony Mussari, with his wife, Kitch Loftus-Mussari, has written a book, documenting his second chance at life after undergoing quadruple bypass surgery.

## Mussari writes book on heart surgery experience

It was quite a shock when Dr. Anthony Mussari discovered that a series of cardiac events threatened his life.

Suffering from heart disease without realizing it at the age of 65, Mussari's first face-to-face meeting with death came while filming the 2007 West Side Memorial Day Parade.

Mussari, Professor Emeritus at King's College, and his wife, Kitch Loftus-Mussari, produce "Windsor Park Stories," a television series shot in the perennial garden they created in 1996 in the backyard of their Back Mountain home as an outdoor set for what has become the longest-running, privately owned, independently produced television program in the history of Northeast Pennsylvania.

"Step Into My Heart: Heart Disease and Open Heart Surgery, My New Best Friends," written by Mussari, with his wife, brings to light his powerful experience as a patient transformed by open-heart surgery.

"The severity of the pain that I experienced while videotaping the parade was unlike any I'd ever

felt before and it told me that something was drastically wrong," Mussari said.

He soon learned from doctors that he had four blocked arteries and was left with very little choice but to undergo bypass surgery.

After undergoing quadruple bypass surgery in June 2007 at Wilkes-Barre General Hospital, Mussari wrote the autobiography to document his second chance at life.

In the book, Mussari talks candidly about his experiences before, during and after surgery and provides readers with an insight into understanding open-heart bypass surgery and the way it can change one's life in positive ways.

"I was afraid and in denial about my symptoms and I refused to get help until I had a cardiac event," Mussari said.

The book describes recommended screening tests and key measures for healthy living, such as proper nutrition, physical activity and stress reduction—all of which lead to a healthy heart and may help increase longevity.
