Thirteen high school students from New Jersey and Pennsylvania gained valuable insight into the popular field of teacher education at the Misericordia University Future Teachers Summer Career Exploration Camp in June.

The three-day and two-night Misericordia Future Teachers Career Exploration Camp provided an opportunity for junior and senior high school students to learn about the education profession.

The students participated in hands-on sessions designed to introduce the future teachers to methods and strategies that real educators utilize to make learning fun and meet the diverse needs of all learners.

Participating students also experience what it is like to live on a college campus during their overnight stay.
