keep the expense because students are required to take the tests at the end of Advanced Placement courses.

Galicki said, while the item as removed from the budget to save money, students getting free and reduced lunch would have their tests paid for by the district and other students would be given the option to start a savings account with the district credit union in order to pay for the tests.

Galicki also said he is unsure how the expense will be funded, but the board will "have to find some extra money to cover for the tests."

In other news, the board...

• Approved the farmstead and homestead real state tax reduction for the 2011-12 school year, which will total \$52.62

• Approved in a 6-2 vote the formal resignation of Paul Reinert as assistant superintendent. Reinert was hired as the Wycallis **Elementary School principal and** director of curriculum and instruction last month.

 Appointed Crys Jennings as a long-term substitute English teacher in the high school, replacing Sarah Kashatus at a salary of \$39,074.

• Appointed Lissa Munley as a long-term substitute reading/ English teacher in the high and middle schools, replacing Angela Pacini-Carpenter at a salary of \$35,295.

• Appointed Ed Kelly as head iver of the district mini-bus and hini-van fleet with a raise of an extra \$1.50 per hour. Kelly's current rate is \$13.50 per hour.

• Appointed Joan Rakowski as Saturday suspension monitor for the 2011-12 year.

• Appointed the following high school faculty as department chairs for the 2011-12 school year with a stipend of \$499 and an additional \$60 per person in their respective department: Claire Morris, art; Anne Butler, English; Audrey Ide, family and consumer sciences; Candyce Fike, foreign language; Raelene Daring, guidance; Laura O'Malley, health services; Louise Roberts, library services; Sandy Sprau, mathematics; Todd Hunter, music; Susan Kotch, science; Tom Gilroy, social science; Mike Cherinka, technology education; and Ruth Skammer, wellness. The following middle school faculty members were appointed as secondary associate department

"own fault."

"You can't stop anything from coming," she said. "But we have no control over where it will be because we have no zoning.'

Dallas Township residents have publicly protested the placement of the metering station at a location off Hildebrandt Road about 1,800 feet from the four Dallas schools. Dallas Township officials are currently in negotiations with Williams to finalize metering station and pipeline plans for the area.

Sam Hockman, a 36-year Northmoreland Township resident, said his property is less than a quarter-mile away from the proposed site.

"We know that we can't do a thing about it but we're still concerned about the metering station and the chemicals that are going to have to be stored there as part of the process," he said. "...We can't do what Dallas did, which is basically make the process more timely and difficult. That's why they kicked themselves to come here."

Hockman said zoning was studied for about a year and a half about five years ago and the board voted against the measure.

them," he said.

Resident Jimmy Sickler had some specific questions - and strong words - for the Williams representatives during the question-and-answer period of the session.

He wanted to know why the proposed pipeline's wall thickness was less in Northmoreland Township than that of proposed pieces in Dallas Township.

in Northmoreland posed Township is Class 2, which would be 0.465 inches thick. whereas the class planned for Dallas Township is Class 4, the highest federally regulated class. The class level is to ask questions late into the dependent upon population density and the population's proposed impact on the pipeline - Northmoreland Township has a population of fected," said resident Elaine about 1,600 while Dallas McGrady. "I'm not an advo-Township's population is cate of this... (my worries more than 8,000 residents. are) the impact on the envi-

Williams representative line's safety other than its "'Not in my backyard' is a class, explaining that extersion, and its safety is not dependent on wall thickness.

According to the code of federal regulations, a class 2 pipeline is one that is placed in an area in which there are more than 10 but fewer than 46 buildings intended for human occupancy. A class 4 pipeline is meant for an area where buildings with four or more stories are prevalent and should end 220 yards from the nearest 4-story building.

"The reason that it's thicker in more heavily populated The pipeline class pro- areas is due to just more people encountering that pipe and that's why we're more concerned about folks digging into that line accidentally," said Andrews. While residents continued

night, some felt that the information wasn't enough to quell their fears.

getting better at preparing for flooding on her property.

"I had plastic bags filled with decorations hanging on nails in my basement, so nothing got damaged," she said of the most recent flooding in April.

Huey's basement got washed out in 2006 and the water heater had to be removed from her home because of the extent of the dam- said. age.

Now she waits until county officials knock on her door during heavy rain to take action.

"When they tell me to get out, I get out," she said.

Huey's neighbors, Brenda and major issues develop.

Robert Spencer, said they lost much more in 2006, and now they're waiting for a time when they no longer have to worry.

"We had four feet of water," said Robert Spencer. "It ruined our lawn, and we had anything you would see in a basement in our yard, like kids' clothes, cribs, everything."

Brenda Spencer said she's now always on the look out for flooding anytime there's a rainy forecast in the future.

"It's frustrating because we're always bracing ourselves," she

The Spencers and Huey did say that the county and the township have been better prepared to deal with the damaged bridge, including piling sandbags near the site and warning homeowners before

ENERGY USAGE REDUCTION PROGRAMS FOR ALL HOUSEHOLDS The Obama administration is committed to providing breaks to families making less than \$250,000 per year. These breaks are especially important given the outrageous heating costs that people face. Turmoil in Libya and other oil-producing nations threatens to raise heating costs even higher next winter. Fortunately, most homeowners qualify for some type of program to reduce energy costs. The consultants at US Energy EECO can help determine which program you might qualify for. Fill out the form below and mail it back to us. A limited number of forms will be accepted over the phone by calling 1-866-341-6974 (toll-free).
