MOMENTS IN TIME

By Samantha Weaver

• It's still not known who made the following sage observation: "To succeed in politics, it is sometimes necessary to rise above your principles."

• It was beloved American poet Robert Frost who made the following sage observation: "A bank is a place where they lend you an umbrella in fair weather and ask for it back when it begins to rain."

• In 1938, Time magazine featured Adolph Hitler on the cover as its Man of the Year.

• You might be surprised at some of the amazing feats that can be accomplished with the aid of modern medicine. In 2008, two women in India gave birth at the age of 70. With the aid of egg donation and postmenopausal in vitro fertilization, Rajo Devi Lohan gave birth to her only child, a girl. Charan Singh Panwar and his wife, Omkari Panwar, already had two daughters and five grandchildren, but they wanted a son. Using the same procedure, Omkari had twins, a boy and a girl.

• The first time a toilet was ever seen on television was in the pilot episode of "Leave It to Beaver" in 1957.

• The most common name in the world is Muhammed.

• If you live in the South, home of huge roaches, you probably won't be surprised to learn that a cockroach can live for a week without a head. When the headless insect does finally die, it's from starvation, not from the loss of its head.

• Those who study such things say that there are 45,000 chickens for every person on the planet.
