Nutcrackers on display at library

Eight-year-old Kappler will again display a holiday collection at the Back Mountain Memorial Library. This time it will be nutcrackers at the library for the month

of November. Charlie is a third-grade student at Wycallis Elementary School. He has been collecting nutcrackers for about five years and has 80 figures ranging in size from three inches to three and a half feet. Charlie first became interested in them when his mom decorated his very own

Charlie Christmas tree with mini nutcracker ornaments when he was 3 years old. He then started to receive them as gifts for different holidays throughout the year.

When asked about his favorite nutcrackers, Charlie replied, "I like them all but the Halloween ones are my favorites." He then added, "I like to look for all different kinds of nutcrackers to add to my collection.'

Charlie lives in Dallas with his parents, Chas and Leah Kappler.

Garinger, Mrs. Josephine Norton, Mrs. Max Dreher and Mrs. Harold Cook.

The Dallas Post has been in existence for 124 years. Information for "Only Yesterday" is taken from back issues of the newspaper and is reprinted here exactly as it first appeared.

STRANGE BUT TRUE

By Samantha Weaver

It was much-loved Irish playwright George Bernard Shaw who made the following sage observation: "It is dangerous to be sincere unless you are also stupid.'

If you find brushing your teeth to be tedious, you might want to check out the Blizzident. The makers of this new product use a 3D scan of your teeth to create a custom toothbrush that looks like a mouthpiece

to do is insert the Blizzident in your mouth, bite down and release 10 times, and — voila! — clean teeth in 6 seconds. Be prepared to pay for the convenience, though; a Blizzident of your very own will set you back \$299. The toothbrush will last for a year, though, and replacement bristles are \$89.

Those who study such things say that by the year 2020, more data will be created in

lined with bristles. Supposedly, all you have a single hour than had been created in the entire world over the 30,000 years leading up to the 21st century.

(Here's an experiment for you: Find a piece of paper and write the word "suns." Turn the paper upside down. It still says "suns."

* There are more public libraries in the United States than there are McDonald's restaurants. For the moment, at any rate.
