Harry R. Sherk, Newtown, Pa.

Mr. Harry R. Sherk a noted Baritone player now with the 3rd N. J. Inf. Band, U. S. Army, located at Camp Upton, Long Island was born at Newtown, Pa., July 31, 1890. He started his career as a musician when 9 years old, under Mr. Wm. Givens, a noted cornet virtuoso and bandmaster, during which time he was a promising musician.

In 1914, Mr. Sherk moved to Philadelphia, to take a position with the John Wanamaker store and it was not long until he became a member of the John Wanamaker Band. During that year he saw an opportunity to study Baritone and make a success for himself.

Mr. Sherk began his instructions on Baritone under the well known composer and bandmaster, Charles Sanglear. After one year's instructions on Baritone, Mr. Sherk was promoted to soloist and was assigned to first chair in the Wanamaker Band.

During his experiences with the Wanamaker Band he rendered numerous difficult solos in Egyptian Hall and the Grand Court, before large audiences. He has also had the honor of playing with the world's famous Bandmasters, Sousa, Pryor, Vasella and Santemann.

He has gained a renowned reputation in the army and I will venture to say that he is the coming Baritone of the present age and his ambition is to become one of the world's best soloists which he has achieved only through hard work and constant study.

E. J. Hagerman, U. S. Army.

An earthquake shock in California caused serious property damage and loss of life.

High Cattle Prices Accompany High Beef Prices

If consumers are to pay less for beef, live-stock raisers naturally will receive less for cattle.

If farmers are paid more for live stock, consumers will necessarily pay more for meat.

Swift & Company pays for cattle approximately 90 per cent of the price received for beef and by-products. The remaining 10 per cent pays for dressing, freight to market, operation of distributing houses, and in most cases, delivery to the retailer. Net profits also have to come out of this 10 per cent.

This margin cannot be squeezed arbitrarily without danger of crippling the only effective means of performing the complex service of converting cattle into meat and distributing this meat to the fighting forces and to consumers.

Swift & Company's net profit on beef during 1917 was only 1/4 of a cent per pound. On all products, it was a little less than four cents on each dollar of sales. Complete elimination of these profits would not affect appreciably retail prices of meat, or farm prices of live stock.

Swift & Company will be glad to co-operate in devising methods that will improve conditions in the meat and live stock industry.
