### POINTS WORTH REMEMBERING.

about given in the Intelligence : waste of time and energy.

All teaching should be to develop the powers of doing by doing. The sure way to make study do-

lightful is to teach as if it were. In written exercises, train pupils to correct one another's work.

Use slates and the blackboard in teaching reading from the begin-

the day.

'Teach figures precisely as you I have no more bother." teach words, by the simple law of association.

in their selection.

inspires a thousand, or ought to.

take a good school journal cannot many children and classes with the Press. keep up with the age in which he work by piecemeal, and cut and adapt the material till it really and lives.

One lesson depends on another, closely fitted the minds and hearts foundation on which the others rest. A lesson in the first and second grades should not exceed a quarter of an hour in length under any cir-cumstances.

of the growing creature, and supply Olotment for the Spre Spots. The orator butcher and Freeholder its wants with a wise discrimination who so loves to be known as "Sand and here it is evident that the main thing to do is to bring the organs of Burr" seems to be on the ragged the creature, the eye and the ear edge of something these days. The question as to when this cen-

tury will end and the next begin is

more and more upon us, as the few

Teachers must not forget that correct thinking must precede all attempts at talking, whether by young and old. Evangelist on this point says :

Your work as an instructor of boys and girls is an exceedingly noble one, and as a teacher you can and ought to be one of the best.

The greatest care should be taken years that intervene are rapidly sylvania and New Jersey propose to to have pupils write figures and signs very distinctly, to arrange their work work basic their work neatly, and never do one of The Evangelist some months ago, They are to be sent in cans from riour and it has been carried on widely. Oregon and California. bit of work carelessly. Some maintain that the new century

In teaching history, supplement the dry, condensed statements of begins the moment 1899 turns to the textbooks by anecdotes, incid- 1900;others that 1901 is the first ents, stories, and biographical year of the new century. There is sketches of noted men, drawn from one consideration which I have not your memory or from good books.

### A SCOTCH EDUCATOR'S OPIN. ION.

"The first great misconception in gin. No one will dispute that the this business is what I might call first decade of this century ended the besetting sin of the professional with the year 1810; the first quarter educator, to act exactly in the teeth ended with the year 1825; the first of what the word etymologically half ended, not with 1849, but with means, as if education meant 'put- 1850, and therefore the complete ting into' a man, instead of 'draw, century must end with 1900; other ing out.' But the human brain is wise we have only forty-nine years not a knowledge-box, to be furnished in its second half. There is yet anall round and stuffed all through other way of settling the question. with all sorts of scientific facts. The first century did not end with historical dates, and dogmatic pro- the year 99, but with the year 100, positions, daly stamped and labled and the second century began with the year 101; the second century like so many articles in a shop.

"Not so. The human mind is a therefore must have closed with the soil and a garden and a growth ; and year 200 ; the third with the year the seed that grows there is planted 300; the tenth with the year 1000; by God Almighty, and not by any and the nineteenth must close with mortal man. On this principle the the year 1800. The simple rule is wisest of the wise Greaks, the great that it takes a full 100 years to make preacher of reason. So mates, con- a century ; therefore full 1909 years stantly acted ; as an educator he to make nineteen centuries. The aspired to be nothing more than an next century therefore does not beobstetrical attendant, wisely watch. gin with 1900, but with 1901, just ing and helping an intellectual birth as the first century began with the with the creation of which he had year one. Consequently, including the year begun, we now have four nothing to do.

"On this principle, the first busi years remaining of the nineteenth ness is to watch the natural oraving century.
