LAYTON.

Our Layton sports are giving the bass in the Delaware a great deal of trouble and annoyance. Almost every day some of them daugle live balt, angle worms, grass-hoppers, crickets, or helgamites before their astoniabed gase in panoramic vari-ety. Pretty soon the big flah will become so dazed that they will swallow balt, hook, sinker, and bob, and then some happy fisherman will pull him in and tell us the greatest fish yarn of the season. Of course we will print it.

The school house at Bevans was struck by lightning on Tuesday the 19th, damaging the belfry to some extent, tearing off some siding, and splitting one corner post, besides some damage to the interior. It was not set on fire. Adjusted by the Sussex Mutual at \$40.

Why should men gather together to give thanks, and offer up praise to the Giver of every good and perfect gift, the essence of love, the embodiment of all that is tender and divine, even to God for his aid and assistance in the sinking of Spanish ships, the maining, killing and drowning of Spanish sallors, and the successes of hor-rid, cruel war. Does any one believe that God delights in butchery and bloodshed? Out upon such hypocrisy! Politics begin to warm up just a little in Sussex and a candidate for Sheriff in the person of J. Frank Backster has been in Sandyston to get the political pulse. With no very prominent national issue up it should not be difficult to nominate a high class of men to office in old Sussex this Fall. At least let us all try and do a little bottee than last Fall, and caution the candidates not to accept a friend's tickets and carry them around in his coat tall pocket until the time to use them to good effect is past. Now brethren let as proceed.

We hear considerable growling at Uncls Sam's war tax, but most by those who get a rap on their tobacco or beer. As neither we have little to say about it further than that there will be more growling before the expenses of this great political barbe-cue, called war, is settled.

Culver's Gap to tourists and summe boarders is the fishing. It will pay to pre serve and to improve it. It has an actual cash value. Every one in that vicinity should endeavor to discourage and preven posching, and the unlawful taking of fish from these waters. The question of bone-fit flowing from it is broad, and of vast import not only to property owners near the lakes, but to the Borough of Branch-

We fear that the law making it a misdemeanor to have bass in one's possession less than nine inches in length is going to be an awful strain on many a fisherman's see, and the tape measures will be put through a course of shrinking to mee the emergency. Bass will all measure inches, or over, at this time of year, and I very much doubt if any one can detect the difference in flavor of one that measure but eight; don't think I could myself, but then you see I am not going to try. Hope some one will, though, who has more

It is surprising to what an extent the Canada thistle has made the farms of this valley its home. Few farms are without its patch of them of greater or less extent. A determined effort would ultimately clear them out, but the farmers will never act in concert, and the probabilities are that this unwelcome stranger will eling to us like our sins, to all eternity.

We think we know a good thing when we see it, and as Brother Highram Hankins is a great authority on trout, and a very cunning writer anyway, we started in for a liberal "eddication" by subscribing for the Gasette, and here he has almost quit writing—pumped hisself dry as it were alreity. We hoped that Brother Highram's reading of the Pike County Piess would sprout a new and better crop of ideas, but it seems we are doome to disappointment.
