Harry Harnato, who has just died in the prime of life, is the latest ad-dition to the list of South African millionaires whose lives have closed prenaturely and often tragically. Rhodes, it will be remembered, did not live to see his forty-ninth birthday, although he had qualified as a millionaire at least twenty years earlier, and Barney Barnato was only 46 when he came to his tragic end on the high seas, but he had lived long enough to leave nearly £1,000,000 behind him.

Woolf Joel, Barnato's nephew, was much younger when at 34 a bullet put an end to his life at Johannesburg ten years or so ago, and yet he was able to leave an estate valued at £1 276 000; Herbert MatthewDavies accumus lated £734,000 before he died at the age of 43, and Mr. Belt had made and left his millions before he had long completed half a century of years.

Indian Unrest.

Unrest in India is obviously becoming more eminous. That is confeased by the government in its enactment of a "summary justice" bill for dealing with sedition. For weeks the news from that empire has been almost daily marked with reports of dacoity, or of assassination attempted or effected. Dynamite plots have been discovered bomb-throwing has been indulged in court and juries where condemnation proceedings are necessitated by refusal of property owners to sell at a reasonable figure.

The bill provides that not more than are numerous in the press. There have that the government is now facing the most serious problem which it has had before it since the great mutiny of half a century ago.

That the acoffers and cross-ques ioners of the Suffragettes often bring confusion upon their own heads was well illustrated at a recent meeting at which Mrs. Borrmann Wells was de-livering an address. "Why don't you get married?"
"There is one serious objection to your suggestion," replied Mrs. Wells, "and the objection I refer to is at present standing beside this platform in the person of Mr. Weils.

Advance of Forestry.

The announcement that the largest owners of pulp-wood forests in this country have applied to Chief Pinchos of the Pederal Bureau of Forestry for advice and aid indicates the advance which scientific forestation has made. It also suggests the possible working out of the problem of State regula-tion of privately owned forests. There has been question of the constitutionallty of such regulation. But if the value of forestry can be demonstrated so that private owners voluntarily subject their wooded lands to the supervision of the State bureau the end will be accomplished. The action of a great paper company in seeking Mr. Pinchot's services may be follow ed by other forest owners.
