

The cake will be good and the proshould be sufficient inducement for a large patronage.

PAUPACK

Hot, dry and dusty here at present Quite a faw years since we have had as cold a 4th as the one just passed.

July 5th was spent by a number of our people at Fairview Lake. In the morning there was a ball game be tween the Brooklyn and Panpack boys. In the alternoop a foot-ball game by the Brooklyn boys and a large display of fireworks in the oven ing was very much enjoyed by all.

Philip Killam, wife and children of Housesdale were guests of J. G Kullam and wife the past fow days.

Rath Killam and Susie Cross of Hawley spent part of last week with from the roots of some of the trees, and roots in all stages of growth

F. M. Gilpin, wife and daughter of Hawley returned to their home Tuesday at a short time spent at the Williams homestead.

Misses Frank and Mable Pellett spent the 4th with Wilmer Hopps and wits at Greentown.

Kata Gunable of Milford is spending a week with relativas here.

Cluss Loring and wife of Hamilinton spont Saturday and Sunday with the latters eister Mrs W. H. Clark

After a few days at Scranton, Mar cus Analey returned home the 6th.

There will be an ice cream social held at the church the evening of the 7th. Proceeds for Sonday school.

During the past weak hoarders arrived at Maple Farm and Bublers.

Beveral Psupack boys attended the dance at Biooming Grove July 3.

p. m. for the benefit of the V. L A. seen them till they stumbled over The cake will be good and the pros them some dark night. The knee is of solid woad, has no limbs or leaves, is anywhere from 6 inches to 6 feet in height, and its rounded top and is not enforced.

In seight, and its rounded top and flattened sides give it very much the shape of a human leg bent at the knee till thigh anl calf are brought together; hence the appropriate name of "knee."

For a number of years I was curfous as to what part the knees played in the life of the cypress tree, writes wish to do, and quotes this incident i

a correspondent of Forest tree, writes a correspondent of Forest and Stream, for they are part of its sys-tem and do not grow independently. They wore not sprouts, trying to grow into trees, for they never de-veloped branches; and the final con-clusion was that their only mes was for people to simulae over. How for people to stumble over. How and why such meless appendages to the tree were formed was a mystery

until one day, when drifting down a doep channel which had been washed mother. through a cypress swamp, the secret

"What elco?" The earth had been washed away

were in sight. None of these roots was less than 2 is inches thick and of uniform size clear to their tips, or rather clear to their blunt ends, for these sense to their blunt ends, for there was no tip.

Nature Intended these roots to urow in soft mud, and they were all right for that purpose, but when the blunt end of a root encountered mething too hard to push throngs ast real-tance, and this was generally toward the top of the ground it bent or buckled in the line of and the continuing growth of the root pushing the bend further up-ward made the bend closer, until finally the two arms of the bend were close together and they grew together, with one sheet of bark ensing both.

transmission.

Daring California. California has the world-wide rep-utation of fathering the most daring ongineering projects in the world in the way of electrical generation and

porting firms that loudly cry, "Back to the vegetable dyes." It is to them the credit is given that a royal edict was fasued more than eight years ago forbidding the introduction of aniline forbidding the introduc loring material. This law, however, Faith and Works.

The author of "Seventy Year-Young," Mrs. Emily P. Bishop, de clares that it is as easy to do as t

illustration, says an exchange A little girl's brother set a trap catch birds. She knew it was wron cruel, against the laws of kind es altogether inexcusable from her poin of view. She wept at first; then a little late. her mother noticed that she had be

come cheerful once more, and inquired "What did you do?" asked the

"I prayed for my brother to be made a better boy."

"I prayed that the trap would not catch any little birds." "What else?" "Then I went out and kicked the old trap all to pieces."

How Dickens Learned to Write. When asked by one of those wise

acres who are convinced that in order to write good English a man must be taught to write bad Latin where his son was educated, Mr. John Dick-ens replied with considerable aplomb that his son-er-well his son-ermight be almost said, in a sense, to have educated himself. The street, the warehouse, Mr. Creakle, an atto ney's office, the reporters' gallery, and postchaise such was the education that equipped a young man of twenty four to preside at the banquer of lit

sour to pressue at the banquer of hi-erature at an unproceedensied age, to make the best speeches in London, to go into the best society, to see the table is a room to lead every com-pany in which he mixed, to travel, ac-quire French and Italian with enco. and write the most animated letters norwn to the modern world .-- London

Economical Puddings. Grind into a receptacle, from time to time, as they accumulate, all leftovers of caks, biscufts, doughnuts, stc., and enough stals bre-1 to make a half-and-balf proportion. When you require a plain pudding take three cupatul of the mixture, add one-half cup of molasses, one-half cup of milk and water, one egg, a dash of salt and a scant teaspoonful of sods. Steam in a double boller for one and a half

When a rich pudding is preferred add to the same ingredients a half-package of seeded raisins, snother ogg, one grated carrot, and two ounces of mixed peels, lamon and orange. Add flour enough to make it the right onsistency, and steam for about two

For either pudding a hard or a boiled sauce may be added. Keep the crumbs in a dry, fresh, cool place.

One morning while at the black tind her, the teacher turned around "Johnny, what are you doing?" "Nothing," he roplied. "Harry what are you doing?" "Harry what are you doing?" "Harry what are you doing?"

all Drug Take Hall's Family Pills for constipu ainging Kettles. The Japanese, who know no well how to add little, unexpected attrac-tions to everyday life, manufacture, in a great variety of forms, iron teaket-ties which break into song when the water bolls. The song may not be very perfect melody, but it is perhaps as agreenble as the notes produced by some of the insects which the Japan-ets also treasure for their music. The harmonious counds of the teaketties are produced by steam bubbles ecceping from beneath thin sheets of iron fastened clove together, nearly at the bottom of the kottles. To pro-duce the best affects some skill is required in regulating the fire. The character of the sound varies with the form of the kettle. These curious inging kettles have been used by th people for many centuries. An Unlucky Date for Royalty. The number fourteen has co
