REASSURING.

Mrs. Diggs—James, there's surely a man under the bed. Diggs—Then let him stay there. Mrs. Diggs—But he might come out and shoot me. Diggs—Don't worry, maybe he has nothing with him but a butcher knife or a stiletto.

All He Wanted.

One morning not long ago there burst into the office of a physician in Tacoma, Pennsylvania, an excited individual, who, as he perceived the doctor just disappearing into his consulting room with a patient, exclaimed:

The Hen's Origin.

Passing over other interesting pheasant questions must be made of what has proven to be economically the most valuable bird on the earth to mankind—the red jungle fowl. Ornithologists know it as Gallus galus, and it is indeed the "fowl of fowls"; for from it has been bred every variety of domestic poultry, game, Langshan, Polish, Plymouth Rock, Leghorns, etc.

Harmless Coffee Wanted.

A number of experiments have been carried out with the object of preparing a caffeine free product from the coffee seeds. A satisfactory result was obtained by certain methods which aim at subjecting the entire raw seeds to a procedure by means of which the caffeine salts are decomposed and the seeds are rendered amenable to subsequent extraction with a volatile solvent of caffeine.

A Poor Standard.

"Do you regard the stage as an educator?" "Not exactly," answered Miss Cayenne. "It would be unfortunate if we were to get our ideas of society from the problems play and our ideas of costume from the musical comedy."

Low Ideal.

Old Fashioned Mother—Arise, son; the early bird gets the worm, you know. Laxy Son—Mother, would you have me beat some poor little bird out of a worm?

The Penang Patrol Wagon.

Writing of the local patrol wagon the Penang correspondent of the Straits Times, Singapore, says: "It forcibly calls to mind at first sight a four wheeled baker's cart, but the fact that it is drawn by about the slowest pair of bullocks in the settlement, there is nothing grim at all about it, for it is commanded by a sleepy Malay constable perched on the box; its roof and sides are formed of white canvas, and it has no door to close at the back, but merely an opening in which another Malay constable half slumbers. Two or three other constables ride inside sitting on the benches with the prisoners, who seem to be struck with novelty of the ride to make any attempt at escape. I should say that an escape from this prison van would be as easy as falling off a log."

San Salvador Prosperous.

"San Salvador is in good many respects the best country in Central America," declared Felix Mugden, a merchant of that place, who has just returned from a trip to Europe. "I make this statement because I believe that it is true. Financially and in a great many other respects the country is far ahead of its neighbors. We have not the disturbances that have racked some of the other Central American nations, and we have not interfered in the troubles of others. The President of our country, Figueres, is a fine man in many ways, and we all love and respect him. He is doing much for San Salvador. He is honest and is an able statesman of the highest type, besides having a fine record as a soldier. He has been a conspicuous figure in public affairs for more than forty years. We did not feel the depression that disturbed business in this country, and commercially we are prosperous. The indications are that the coffee crop this year will be good, and prices promise also to be very favorable."

The King and the Boy.

An amusing anecdote relating to the King's recent stay at Brighton was related last evening by the Rev. Cecil Maunsell, vicar of Thorpe Malsor, to a gathering of his parishioners, who made a presentation to him in celebration of his return from Brighton, where he has been staying for the benefit of his health.

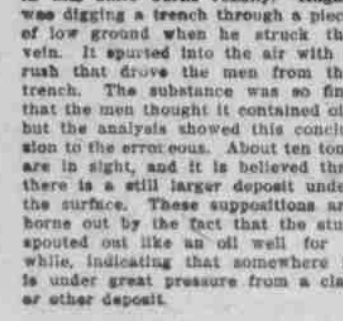

Discovery of Peat Bog in Maine.

An analysis of the strange mixture which erupted from the foot in the air when Henry Hagan was digging a trench on the Alton Davis place at Norridgewock, Me., a few weeks ago shows that it is the finest peat.

Never Meddled with the Sun But Knew About Moon.

During a recent term of the United States Court at Frankfort, Ky., there appeared before Judge A. J. M. Cochran a tall, lanky, awkward specimen of humanity from the mountainous regions of Jackson, Ky., where the chief industries of the natives are feuds and illicit stills.

A CONFIDENCE.

A Good Bargain.

"I wish," said a Capitol Hill man recently, that peddlers would keep away from my house. Somehow or other my wife can't help buying their wares, whether she needs them or not. All the peddler has to do is to say his article is cheap. When I get home at night I usually find some new stove polish, a new fangled kitchen utensil or something else lying around. Last night my wife had a bottle of something to show me when I entered the house.

The Only Way to Know.

Catherine had asked so many questions and father was growing impatient. Finally he said, "O, Catherine, I can't answer half your questions. I know you can't, father, but then I do not know which half you can't answer."

A Failed Community.

Mr. Leslie M. Shaw, who used to be the favorite son of Iowa and who can't be a prodigal yet, because you don't hear of any fatted calves being cooked for him out in Manila, Ia. (spell it with two 'l's')—Mr. Leslie Mortimer Shaw (no symbolism in the middle name) says that out his old way the people met the panic with something that, though Mr. Shaw doesn't so describe it, must have been a combination of the courage of conviction in their heads and the fear of God in their hearts. He says that in a little town in Clinton county, where there was only one bank, and where that bank seemed likely to fail, the banker—it was a private bank—just closed his doors and hung out a sign that read as follows:

This Bank Ain't Failed.

The Community's Failed. When the Community Comes to Agin, This Bank will Resume Business.

What the Professor Wanted.

The professor steps into the barber's chair and assumes an attitude of deep meditation. "Hair cut, sir?" "Please!" The barber cuts his hair. "Disse a shampoo?" "Um—please!" He gets the shampoo. "Shave you, sir?" "Surely, sir." "Massago?" He nods assent, and consequently is massaged. The barber removes the towel, the professor arises and mechanically takes the proffered check. "What's this?" "Your check, sir." "My check?" "Certainly, sir. Haircut, shampoo, shave and massage."

What's queer, sir?

"What's queer, sir?" asks the barber in dismay. "Why, the working of the human mind. What I came in for was to have my razor honed."

Marie Antoinette's Books.

The unhappy Queen Maria Antoinette possessed an important library of 4,712 volumes, consisting of plays and romances, little books a la mode, the works of Pascal, Bossuet, Fenelon, Bourdaloue, Massillon, Boileau, Cousseau, Corneille, Moliere, Voltaire and many others. She was passionately and had a large collection of operas in eighty-five numbers. The bindings were by Biazot and were uniform in red morocco, with the arms of France and Austria stamped upon them. The execution of the work was poor and the decadence in the art of binding evident. The glories of the art of Palsioup and the Demoulin had passed away, and the revolution had actually killed whatever knowledge remained of the ancient skill of the bookbinders. Half a century later saw its revival in France, and the art has since flourished both there and on English soil.

Remarkable as these facts are, proof is forthcoming in the fact that if any breed of poultry be allowed to run wild, they will gradually revert to this ancestral type and after a certain number of generations will have reverted to typical jungle fowl—N. Y. Post.

A satisfactory result was obtained by certain methods which aim at subjecting the entire raw seeds to a procedure by means of which the caffeine salts are decomposed and the seeds are rendered amenable to subsequent extraction with a volatile solvent of caffeine. This procedure is at present employed in Bremen and in Mannheim, Germany. Nature has produced a plant free from caffeine, native of Madagascar and Reunion, but unfit for use on account of its bitter principle. Grafting experiments have not yet proved successful. The requirements in case of the artificial non-poisonous product are its almost entire harmlessness, together with an unchanged appearance, taste and aroma.
