FORGETTING HOW TO PLAY.

Irban Life Robs Children of Sponta-

nelty, Says Mr. Chubb. "In our orhan life we have reached he time when children have to be schooled to play," said Percival Chubb a his lecture on "The Origin and Evolution of Play" before the Federales for Child Study at the Ethical Culture 5 hool. "Education has had a ity naboly hands on play, and we lading courses in play. City chil-ren are losing the art of spontan-us play because the city affords them

space for play." The spirit of play had gone out of duit life, too, Mr. Chubb mid, be-sure meh and women had been "de-traded by toil. We are slaves to the oddess of opportunity. Fathers don't now how to play with their children, or do they give themselves time. And for the children don't have time either, or they have to study evenings." Mothers, he said, had forgotten-the

d play traditions, and many couldn't on play cat's cradle with their i = He added that the perverted t of play was responsible for freets. "These boodiums should be laying baseball, instead of going to the on at a game now and then."

Bunyan's Namesake.

Wanted, a copyright in great amen! John Bunyan, the other day was charged before the Highgate Bench with stealing cake from a cof-fee stall. "I remember that name." said the magistrate, in remanding the 15-year-old pilgrim. Really, parents should refrain from such baptismal ques! - London Chronicie.

FLOWER IMITATES INSECTS. Curibus System of Tubes that Run

多的多

Longth of Their Bodies. I andinhber animals have there are a creatured have gills. But once have neither one nor the other. The have a complex system of these run ning throughout the whole live has the body, by means of which it is conveyed to every part of the arr wn As they are destined to contain noth ing but air, they are strongly support

ed to guard against collapse from pressure. This support is furnished by means tected with wire. There are generally two of these tubes which run the

bole length of the insect's body.

Many fles, as larvae, live in the their bodies is a series of exceedingly thin plates, into each of which runs a series of blood vestels. These plates series of clood venters. Those plates act and absorb the oxygen contained in the water. The tail ends in three featberlike projections. By means of these the larvae causes currents of water to now over the gills and thus

water to few over the gills and thus their efficiency is increased.

The guat also lives in the water as a larva. But it has no gills. Therefore it but must breathe air. This is done by means of spicade situated at the tip of its tail is prolonged into a little tube. The larva floats along head downward in the water with the tube just above the surface to chall it to breath? After some time it is provided with two little cibes with the provided with two little tuben will be act in the same manner. Chicago

Why Spain is Poor.

"With all this intelligence, why is the country so poor?" It will be asked. Why are spleaded copper and a ver mines left to be worked by for eigners? Why is the name of Spains of the standard ways of the country with standard to the s why is the name of Spii no often synonymous with stagnalical What is the cause of the inertia which impedie the circulation o movements for education in the proinces, where people can rarely reased write? What is the reason of the and write? What is the reason of the paralysis which cheeks agricultur work, even in such fertile districts. Andalusia, Valencia Galicia, etc.? An what is it that prevents the fulfilmer of projects of industrial value? To a these questions there is but one as swer—it is the want of a pure su frage; and it is the precent dawn of the present of the paraller which write. success in this matter which prom-less a new era for the country. If Al-fonso XIII be allowed to learn the real opinions of his subjects, and to follo s his own good pune as a stateman be will soon steer the ship of state (ni) the harbor of good government.

The New Diamond Fields. From the methods used to locate the stones the new diamond fields in German South Africa might very we i Old Custom Abolished. The British army cornell has de-cided to abolish the old custom of "crying down credit." Under the be called a Tom Tiddler's Ground, ays the Wide World Magazine. The king's regulations, commanding offi-cers, on arriving at a new station, are

ilamonds are very small, but are ex-eedingly plentiful. They are tound in the open descrt, where nothing but sand, unrelieved by the slightest sign of brush or thrub, is to be seen for vast distances. The men who search for the stones-needless to say, they are all nativeshave ten miles to go every morning

from camp.

The searchers work on their hands and knees, apparently regardless of the blinding sunshine, sifting the surface sand through their fingers, Most of them are old Kimberley boys and they are very keen on discovering stones. The district is hardly a parastones. The district is hardly dise for the white man, being ous for its frequent dust storms and

The Hottentots,
The Hottentots are a dwarf race in
Namaland, in South Africa. Their

skin is yellow, brown or gray, not black. The hair is long and woolly; the cheek bones are prominent; eyes are dark chestout or black, wide apart; the mose is very broad and flat, nostrils thick; the mouth is large, with heavy, upturning lips, chin pointed and receding jaw. Their yellew skin has been an enigua to anthropo-logists, and the discovery of similarities in grammar, together with the existence of words representing ab-stractions of a high order, strengthened the theory that the Bushmen Hot-tentots had separated from the Cau-casian kindred in the north in prahistoric times, settling the southern por-tion of the continent, where they were pressed upon later by the Black Bantu tribes. More probably they are an isolated race, like the Australians.

A recent consular report from Lon-don throws light on the rapid rate at which the horse-drawn cab is giving place to the public motor car in the streets of the metropolis. According o figures given by the British home eccotary, the number of Heensed han-A Satisfactory Toothache.
