In all situations, cancer is much more frequent in people over forty, so that if any of the above conditions appear in people beyond this age, they are especially stangerous, and they especially call for early treat ment.

The members of the medical soc ety believe that if people would outlearn to heed danger signals as indi cated that death from cancer should be comparatively rare. The great difficulty heretofore has been that owing to their timidity or their igno range of importance of early treat ment, people have delayed until , condition, which at first was quit--imple and easily curable, has be come too advanced for any treat ment whatever. No one should have my undue dread of cancer, provides that they recognize its presence early and seek immediate treatment.

> The Fresh Air Work The New York Tribune is doing

great work for the poor children of that city by providing a fresh air and to send as many as possible to the country. It asks all who rre willing to aid the good cause by boarding one or more of the children for a couple of weeks to send then names to Rev. John B. Nevins D. D in care of The Tribune. It has made provision for 4000 children this year to be sent to its homes but it wantto send out 8000 more and the question whether it can depends on the willinguess of hospitable and charits ble people to take children in their nomes for alshort time. No expense seyond the board is required. The Tribune pays the fare, and sends the children out in a nest and clean cor lition. People in the country may point for you to consider, think their children suffer from the neat, but could they visit a city tonement district this weather and se the crowded condition of small never enters and see children who outing of a couple of weeks means to the distressed little mortals. Horace

The Summer Boarders

There is general complaint in this and near by sections that the city boarder is not disporting himself in numbers as large as usual. Various reasons are assigned for the delinquency among them that the automobile has captured many, not alone The Inspector is named for the the persons but their pockets and syton road and the appointed is at instead of quietly settling down in some favored spot they are kicking np a dust throughout the country.

sprending their dollars over more territory, perhaps not so many on board and clothes because some must go for cost and upkeep of the ma-

chine. If this reason is the true one then with the probable chaspening of machines in the future and the development of freedom from restric. tions and the pleasure of sight seeing in the country coming seasons may find more people enjoying their vacations by making trips in autos. Tue sequestored nook and shady g'an will give way to the rush over the roads and the varied scenery along them. Times change and we change with them and there is constant necessity that we adjust oursalves to new conditions. One of them might be to induce city people to become cottage owners here and make this the central point of their excursions. A good live real estate ernt might be a blessing to the GWD.

WORKS 24 HOURS A DAY The busiest little things ever made are Dr. King's New Life Pills. Every pill is a sugar-conted globule of health, that changes weakness into strength, languor, into energy, brain-fag into mental power; curing Constipation, Headache, Chills, Dyspepsia, Maiaria. 256, at all druggiets.

Your First Job

Many recent graduates of colleges and normal schools are either seeking, or have just secured a position. and their future will largely depend on how they apply themselves o keep it. The opportunities for advancement are just as good as ever, but more intelligence and application is required. Don't watch the clock too closely, put the mind on the work and fry and make a success of what you can do. The pay according to your idea may not be sufficient for your capacity, but it so your employer will soon make the discovery and you will be paid according to your worth to him. That is the
