THE RAZORBACK HOG.

Menace to Hunters—Destroys Eggs and Young of Game Birds.

A North Carolina correspondent says that through the enforcing of the stock laws in the mountains of that State the ravages of the razorback hog are being curtailed.

"In a number of the Southern and Middle Western States hogs are permitted to roam at will through the woods and river bottoms of sparsely settled regions. An attempt is made to mark them by means of notching, slitting or clipping the ears, an unsatisfactory method at best, and one which has caused many a neighborhood feud and the spilling of some human blood.

There is always a certain percentage of these hogs that cannot be claimed or taken up by any person, because proof of ownership is lacking, and as the practice has been in vogue for a great many years there are plenty of genuine wild hogs.

Whether or not the progenitors of the razorback hog were fat, slow going beasts, such as prosperous farmers own, we do not know. The fact is that the present woods rangers are long of leg, swift of foot and so lean that the term "razorback" is fairly appropriate. Accustomed to encounters with other woods prowlers in defense of their young, they have developed courage of a sort, and while they will not attack men they often set upon hunting dogs, invade camps, and despoil everything within their reach.

In the regions infested by these scavengers the loss in eggs and the young of game birds is very large. Where there are no fences the razorbacks scour the woods so carefully that nothing they will eat escapes. They travel fast and far and rake the country as with a fine tooth comb. Their sense of smell is highly developed, and the eggs and young of ground nesting birds are never safe when they are abroad.

Found a Buried Town.

Every once in a while excavation in northern Arizona results in the discovery of a buried village. The most recent discovery of this kind was made by Frank C. Irwin at his home, fourteen miles from Cochise.

Three miles from his ranch Irwin started to dig an irrigation ditch. Only a few feet under the surface he began to uncover utensils of a strange and material which indicated that they had been used by a race probably as old as the Cliffs, that strange people whom "Baron Fusicus Otiac" was the lure that brought Father Kino and the negro Estevanico from the Spanish station at Culiacan north along the Sonora River to the old city of Tubac, near Tucson, which expedition was the beginning of civilization in Arizona.

After digging deeper Irwin came across a wall, which he followed for twenty feet. Further investigation brought to light hundreds of bones well preserved, one skeleton being intact. When an attempt was made to take up the skeleton it fell to pieces. Among the treasures unearthed was a dish on which were written curious figures representing men and birds and animals. Irwin took several of the relics into Tombstone, and will send others to the Smithsonian Institution.—Kansas City Star.

Depths of the Sea.

The variations of the depths of the seas are remarkable. From recent soundings we learn from a Paris contemporary that in certain parts of the Pacific Ocean the depth is 5,000 fathoms, that is, about the distance from Trafalgar Square to New Cross Gate. Other great depths recorded are the North Atlantic, 3,37; meters; South Pacific, 3,300; South Atlantic, 7,040; Indian Ocean, 4,200; Caribbean Sea, 4,275. The water is 30 fathoms. On the other hand, the Baltic is comparatively shallow, not quite 600 meters. In clear water, when the sun is shining, a diver can easily see to work at a depth of 20 meters. At 50 meters very little can be distinguished. So great that depth is as dark as night.—London Globe.

Law and Geography.

From the bail bonds papers with us at a recent term examination: "Name of the chief executive of the State. Are you acting as bail for any person under 16 years now in this public house. Knowledge and fee on bail as person under the age of 16 years must make affidavit and no person should bail one that is married with any. By brother Bill is now all right for the operation. He was 16 last March." How is a geography answer: "The river system of Canada is what you might call very good, but sometimes they shoot the rapids and unless you are a real Indian this is very unpleasant at times, especially when you get ambush under the Captain Kidd."—Manchester Guardian.

Fortunate Accident.

Visitor—I wouldn't want to wake in your shoes.

Miss Smallbon (coldly) — You couldn't.

Are You Good?

"Say, Pop, what's a prodigal?"

"A prodigal, my son, is one who, at any rate, throws them with."

Responsibility.

Uncle Silas (to visitor who persistently borrows about the tables)—What on earth are you waiting for, now? I don't want you. Walter—Excuse me, sir, but I am responsible for the silver.—Tit-Bits.

Valuable Information.

A—I used a word in speaking to my wife which offended her sorely a week ago. She has not spoken to me since. Q—Would you mind telling me what it was?

Not Clear to Him.

She—Now is it you are always out when I call?

He—Just lucky.

PIKE COUNTY REALTY EXCHANGE

List your property with us if you wish to sell.

City people are looking for summer homes, bungalow sites, camp locations and farms in this section.

We can place your property before city buyers through our New York Office.

Those who have furnished houses to rent should list them with us. We will have applicants for them.

No systematic and businesslike method has been adopted heretofore to fill shanty lines before city people the attractions of Pike County and to bring them in close touch with this section. Many people would establish summer homes here if they knew of the ideal conditions. Pure water and air, freedom from mosquitos, good sights and beautiful scenery are what people in the cities are searching for. Pike County is within three hours of New York City, and with the reasonable, reasonable distance, instead of constituting a drawback, is now considered by people who can buy, an advantage, especially in the selection of a country site.

The Pike County Realty Exchange proposes by legitimate advertising to bring city people in close touch with the natural advantages of Pike County and to establish a headquarters for property owners to list their property and at which prospective purchasers may apply for the sites of properties they wish to obtain. Thus a medium of exchange will be established at which sellers and purchasers may be brought together.

A live agent is often said to be worth more than any other person. It has been truthfully said. Of course, The Pike County Realty Exchange, has not been established primarily for a profits purpose, but the accomplishment of this locality will be one of its objects.

Every new citizen we secure increases the value of all other property. Those who list their property for sale and prospective purchasers will find it to their advantage to call at our office.

Our System it is Safe.

Please do not study these statements, but the proof is our free book it is your duty to send for.

Remember that you can try the Clutha Treatment at our risk. Let it prove all we say. It is safe to back your rupture every minute of the day. It won't cost you a penny.

Free Book Tells.

Our book tells a story which none of us can tell. We have learned about how to cure cases of rupture after we received the treatment of some other concern.

This book explains why elastic, spring and screw trusses or appliances can never cure. It explains about operations to remove the dead tissue scars of the rupture called "cicatrix." It puts you on guard against throwing money away.

This book tells all about the Clutha Treatment. Sent free. Write for it today.

Remember, you are given the benefit of the experience of many doctors who have studied, treated and cured thousands of cases of rupture. Why not profit by their knowledge? Why not write for our book?
