### THE NEWS FROM EUROPE.

We print in to-day's paper advices from Eus rope received by the Cambria, of thrilling and momentous importance. The people of France have again arisen in their majesty, and after four days fighting and considerable blood-shed have compelled Louis, Philippe to abdicate his throne and fly to the realist of Victoria for protection and security, while they have also erccted a strong "provisional government," after the model of our own. We give all the details of this great revolution in another column that it was possible, at the late hour of its reception, to do. We would like to give more, but are obliged to forbear. The following able article which we take from the Pennsylvanian will be read with deep interest.
