GOVERNOR SHUNK'S BANK VETO.

time of their expiration.

The importance and responsibility of giving presented during the present session, has induced me to bestow upon the subject my most serious consideration.

The great injuries which have been inflicted legislation on the subject, the utmost caution and deliberation, before they extend a system vicious and deceptive, and ruinous to the laboring and producing portions of the people.

In the annual message, presented to the Genpresent session, I took the occasion to present the following views on the subject.

"Nothing can contribute so much to the cessary to make here people the most indepentrue interests. To advance these, she must ciples, by the artificial contrivances of false economists, whose selfish theories are as delusive as they are destructive of the public good.

"The present is a most propitious period, when their is an abundance of gold and silver testimony, that a reliable opinion can be formin the country, to make a determined effort to ed, as to their solvency, and their title to perincrease its circulation, and secure to the people the currency which the wisdom of the framers of the Constitution of the United States provided. Instead of creating new banks, or increasing the capital of old ones, our efforts should be directed to secure the solvency of those which already exist, and thereby render their circulation sound and reliable.

"Impressed with the force of these considerations, I am convinced that the increase of the and impolitie; and I respectfully recommend that before any one of the existing banks is rechartered, a scarching scrutiny be instituted into its affairs, its management, its credit, and its means; and if it be found that the notes have been suffered to depreciate; that the accomm dations have been bestowed upon favorites, and large speculators, and dealers in montations will promote the public good, and will purpose for which they were established.

while it may, to a moderate extent, diminish the present amount of banking capital, will strengthen public confidence in the other banks, and add to the stability and soundness of the currency. And as it may, also, increase the profits of existing banks, beyond a just compensation to the shareholders for their investments, and as this excess of gain is derived from the special privileges conferred upon them by the Legislature, I recommend, that the tax imposed by the act of the 1st April 1835, upon dividends exceeding six per cent. per annum, be increased. While the inducement to exprohibiting the circulation of foreign notes, under the denomination of five dollars, as soon as the balance of the relief issues is cancelled. This will be a positive advance in the improvepublic secured against the chances of loss by the people may demand.

"The cautionary enactments I have suggested, cannot fail to increase, rather than diminish, the amount of a sound circulating medium, fully entitled to the public confidence. The effect better ultimate security to their creditors, will will be to bring the specie of the country into active circulation, to furnish the people with a

practice, in some of the States, called free bankmg. It is based in part, upon specie, and in part upon State stocks, hypothecated with the government. In other words, banks become the creditors of the Commonwealth, by pur-chasing her bonds; these are deposited with the government, and the government endorses and ought to be reduced. It is the main cause eirculation to an equal amount. I can perceive no grounds for confidence in this system.

It must explode, in a country where it is adopted to contract, ought adopted to any consider able extent, whenever also to be reduced, so as to restrain their arevalsion before to test its stability, for it is a deviation from true principles.
