THE FARMER'S COLUMN.

Making and Freserving Butter.

est urged against Susquehanna Co. Butter is, that it is too salt. Butter salted with the principal cause of failure, in this mode, is

the Buttor at each agreed as more than all channels and the act of the arrow of the contents in a difference of the arrow of the content in a difference o

which will keep longest, the cream should be perfectly sweet when churned. Some experiments, very carefully conducted, some years since, by Dr. Traill of Edinburg, and publish-ed in the Transactions of the Highland Agricultural Society, clearly lead to this conclusion,* and we believe it is supported by the observation of the best butter-makers in this country.

Washing butter, when first taken from the been considerably controverted; but perhaps the true reason of it is not always understood. When the weather is warm, or the eream and milk has been exposed to too high a tempera-ture, the butter is spt to "come soft," and in this state it is very difficult to work it properly. The use of cold water, in such cases, is to harden the butter and facilitate the expulsion of the perfection of the property worked, for on the entro separation of the oleaginous from the serous and cheesey particles; its keeping quali-ties greatly depends. There seems, thereford, to be no objection to the work of the nose of work when thereford. The use of busces, is to harden the butter be property worked, for on the serous and cheesey particles; its keeping quali-ties greatly depends. There seems, thereford, by removing it from the system, to be no objection to the work of the rocking of the store of the seams and permanent. The use of work work is the oleaginous from the serous and cheesey particles; its keeping quali-ties greatly depends. There seems, thereford when for the user of the sea of work weeks. The use of work when thereford and premanent. The sea of work weeks when the order and permanent. The server second hole a set week the the papers with the search would be system-the of the search search and permanent. The search search search and permanent be the system, makes a search and permanent. The search search weeks the the search search search search search search search and permanent. The search search search search and permanent. The search search search when the very root of the state are of the search churn, is a practice the propriety of which has ties greatly depends. There seems, therefore, to be no objection to the use of water, when batter is in the condition above mentioned : but it would on the contrary, appear to be decidedly useful in such cases,

butter could be properly worked and the butter-milk thoroughly expelled without the use of water, would washing be expedient?

Practical results, so far as the knowledge of the writer extends, furnish a negative to this question. If the milk and cream has been Rept in a proper state, and is not to much heat-ed in churning, the butter will generally "come heat" from the system, even when the limbs and boncs are hard," and may be readily worked in a thor- dreadfully swollen. and by dividing parcels of butter, produced waking one portion and working the other wether wether the result of islease as are been exceeded to be waking one portion and working the other wether wether the result of islease as are been exceeded to be well established that be an uncasked portion has been result of isleases. In the object is a protect of a state the state well the three and is a state of a state three well as the state well the three are the state as and had proved to obtaination to all, it effected complete and permaker in the state as and had perved to obtain the three and permisers are the state as and had perved to obtain the three and permisers are the state as and the stat ough manner without water. Trials have been made by dividing parcels of butter, produced much longer when no water is used in making in grine persect unouncer in the cruspitence of a logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale logithat cell call period "the turn of life," should neglect totale life, taget a certain period "the system called" life, taget a certain period may be de aged several years by using this poor medicine in two very invergate cases. They your medicine to two very invergate cases. They life discass to which women are subject. life discass to which be body, not so far impution the system, neglect a subsequent relaxation, which is the case of most period case the weakness period. Second they said she had 'old fashioned for Sating — The best rock salt, made perfect in the spin of the sector of the spin spin of the spin of the spin of the spin of the spin of th benefit. The salt should be intimately incor-porated with the butter when it is first taken from the churn, and the butter should then but set in the dairy room for twenty-four hours, it is not is a opiate or expectorant. It is not intended found firm and solid. If intended for long keeping, the butter should be packed in well if hand the butter should be packed in well if hand it was formerly common to put up. From twenty-five to fifsy pounds is the quan-tity manify wished in a jar or firkin. It is re-commended to keep a strong brine on the but. To use the language of another, 'Dr Draks's Pan-acca is slways salutary in its effects-nover injurious. It is not is a opiate or expectorant. It is not intended found firm and solid. If intended for long keeping, the butter should be packed in well intended for long intended for long tred than it was formerly common to put up. From twenty-five to fifsy pounds is the quan-tity manify wished in a jar or firkin. It is re-commended to keep a strong brine on the but-

must be set so as to spim, without any tonden cy to rise or sink ;' this important object being attained, the length of chain is immaterial.

GRAFTING THE CHEBRY .--- Much complaint The manufacture of Butter is attracting is made of the poor success in grafting the much interest in this county, and if judiciously cherry, incomuch that many have abandoned conducted will handsomely remunerate the farmer. The following article contains many val-with almost invariable success. We find very uable hints, which if strictly followed would little more difficulty in making it live than the greatly improve the quality and consequently apple or pear. In cleft grafting, which, by the enhance the price. That in 'regard to salting way, although the most common mode, is the is specially commended. The objection strong-done early, say in March or the fore part of

common Salina salt is not worth by 3 to 5 cts. the tendency of the bark, in the cherry, to as much as that salted with Liverpool ground start from the stock and to shrink or curl, and

TAHESE Pills are one of the best Medical Compounds in use at the present day .-As a common family physic, for administration in all temporary complaints of the stomach and bowels, head ache, colds, &c., they may be fully depended upon, and a prompt use of them on the first appearance of indisposition will in-variably save much sickness. They are pecu. liarly adapted to all cases of weakness and general debility-any derangement of the system, and especially with females and a steady, un, interrupted use of them, in strict conformity with the directions will very soon restore the organs of the stomach to their natural tone and action, and regulate the bowels, and renovate

the whole system. There is no disposition to give extravagant commendations of them. What is here stated, is the result of actual experience with them. and that through a period of fifteen years. I is not supposed, or pretended, that they wilt raise the dead ; neither are they designed to be used as freely as we use our roop! Such is not the true purpose of medicine. Its only approprinte office is to assist nature in restoring the system to a proper tone and action, when una-boidably, or through carelessness or excess, it vecomes deranged. Many are careless, and hence need this aid. And the most careful are liable to irregularities of the system. It is needless almost to say, that a prompt use of safe and effective remedies, on, the first appearance of illness, is the part of wisdom, IT Such a Medicine the Proprietor knows these Pills to be.____ And he is certain that in forty nine cases out of fifty, where a fair trial is made ac. cording to the directions, they will be used again as a standard medicine. He has never known an instance, where they have been thus used, in which they have not met with UNQUAL. IFIED APPROVAL!

Numerous testimonials may be seen at the General Office of sale, and references will be given to substitutial living witnesses of their valuable curative properties.

The Pills are purely vegetable, are of two kinds, stimulant and purgative, purifying the a bloud, and producing a healthy action through the entire system ; are a valuable Anti Billious Medicine, and emirently useful in all lingering complaints--- Weakness, General Debility, Dyspepsy.Pulmonary Affections, Liver Complaints, Rheumatic and Spasmodic Affections, Female Complaints, Palpitations, &c.

No Family, after a fair trial, will be without them.

They are put up in FIFTY CENT and DOLLAR PACKAGES, each having a pamph. ict embracing a valuable Treatise on Disease, with full directions for use. The Dollar packages are the cheapest to the purchaser. They may be ordered through Druggist, giving the Street and Noi of the General Depot. follow a disordered system, are at once relieved by the medicine.
