THE HTHE'S PILLS are purely vegetable, of two kinds —stimulant and purgative—and in their operation effectually aid digestion, thereby escuring all the purposes for which food is introduced into the stomach—namely—the proper non-lehment if every part of the system; giving consistency and strength to the muscular fibra, purity to the blood, and elasticity and cheerfainess to the temper and disposition: thui demonstrating the proposition laid down in the American Improved Hygeian Vegetable Treatment, that all diseases are essentially the same; and, timely attended to, may be cared by the simplest process—correcting and regulating the stomach, or digestion—substantially the source (in derangement) of all disease.

in all lingering complaints—general debility; dyspepsical, nervous, rheuniatic and billious affections, generally; colds or coughs—all planonary affections in their incipient stages; nervous or sick head ache; palpitation of the heart, or irregular palsation in any form; insbitual continues—all continued derangement, or obstruction, in the system, especially with females—they are recomm anded with unreceived confidence; a confidence based apon a personal argorience with, and an invariably successful use of them has a general family medicine, in the Proprietor's own-family, for a period of upwards of six teen years, and an antent knowledge of their similar use its many other amiliae, and by numberless individuals, during the same period.

A more remarkable health restoring medicine, was never before discovered. This great compound is the result of seven years unremiting labor, research, and experiment, of that profound and scientific medical schollar, Dr. Jumes Bosworth. M. D., professor in the Edinburg Medical Institute. It has become the Highlander's enversal panaces; he kedps it always in his house, as a privertative or as a physician when disease, in any of the above forms has made an attack. It soon became known, and exceedingly popular, after its introduction, for from an account of it, published in Chamber's Edinburg Journal, it reached the unprecedented sale of 357, 000 bottles in the two first years. This great health restorer was first introduced this side of the Attantic by Dr. Julian Demont, of Halifax, who had travelled in Europe on a professional tour, and became acquainted with its remarkable virtues while visiting the various hospitals, in all of which it was made a atmadard remedy. It is highly recommended by physicians and gentlemen of the highest standing in this country, who have used it and possess a fall knowledge of its operatiod. So celebrated has it become, that it has now reched the enor mous weekly.sale of over
