#### Growth of the United states.

William Darby, of Georgetown, D. C., has published a letter in the Washington Union, intreply to some inquiries made by a U.S. Senator, in which re remarks, among other things, that the population of the United States has increased annually, since 1790, at the rate of 3 per cent. The following results, says Mr. D., demonstrates the existence of this great law with mathematical precision :

> A WORD, IN SEASON .- How often has a word spoken in season turned the course of conversation; when it has been running into in some great truth has been happily cheered, some giant objection removed, some favorite vice exposed, and its opposite virtue established, and the hearts of the company surpised into a love of virtue, enlightened, warmed, and made better and happier all their days !

> One good word or motion in apt time and alace hath been known to grow up into a public benefit or a wide extended charity; and a man of little or no note has laid a foundation of happiness to millions of his fellow-creatures by the mere breath of his mouth.

In short, a question asked, a proof de manded, a steadfast countenance, an expressive silence, a truth explained, an instance applied, a motion made in due season, hath availed to silence the scorner, to confound the skeptic, to abash the profane, to dash a wicked greatness, to convict a triumphant calumny, to recover the stray, and to bring blessing upon mankind .- Fletcher.

LABOR.-Man was formed for a life of action and effort. He cannot repose, like the eastern monarch, upon the down of sygnets, nor, like the voluptuous Sybarite, upon his bed of roses. Labor is the law of existence. "In the sweat of thy face shalt thou eat bread," was the judgment passed upon him in Eden-a judgment that will never be revoked, and from which, consequently, it is of no avail to shrink. As for ourself. we would not forego the blessings of physical labor for the greatest gift in the capacity of mortal to bestow : it is indeed, the true Spartan sauce which gives zest and savor to life's cup-bracing the nerves, confirming the health, and rendering the intellectual economy more efficient in the development and commation of its best designs.

The increasing popularity of Dr. G. Dr. G. Benj. Smith-Dear sir: I was had up with a ball cold some tsme since my retarn from N Y., and during my ill-ness I made trial of your pills, and I must say I found them excellent.
