THE TREASURY OF HISTORY. Comprising a general introductory outline of Universal History, ancient and moddern, and a series of separate Histories of every principal nation that exists, their rise, progress, present condition, &c.

BY SAMUEL MAUNDER Author of the "Treasury of knowledge," Biographical Treasury," Literary and Scientific Treasury," &c., including THE HISTORY OF AMERICA.

EDITED BY JOHN INMAN, ESQ.

The republication of this valuable work has been undertaken partly on account of the high favor with which it has been received in England, but chiefly in consideration of its intrinsic value, arising from the felicitous adaption of the plan to a want that has been long and generally felt and from the judgment and fidelity manifested in its execution.—The idea of giving in a single work, of no very formidable dimensions, and at a price which brings it within the reach of very moderate circumstances, a sufficient outline of the world's whole history, and similar outlines of the history of every nation, is so obviously judicious and appropriate as to require no culogium. Every person who cares at all for the acquisition of useful knowledge must desire to possess such a general knowledge of past events, not only in his own country but in all acquisition of useful knowledge must desire to possess such a general knowledge of past events, not only in his own country but in all countries, as shall enable him to understand the perpetually recurring allusions that are found in almost any course of general reading; because for want of such understanding there is always a serious diminution both of pleasure and profit, even in the perusal of such works as are designed chiefly for amusement. For instance, most of Sir Walter Scott's novels are founded upon history, and abound with references to be instance, most of Sir Walter Scott's novels are founded upon history, and abound with references to historal events and personages, a want of some acquaintance with which detracts seriously from the interest and delight hey are so well qualified to awaken; and so of most other works belonging to the better class of what is, called light literature.—
But the difficulty has been to obtain this general knowledge without going through many books, requiring a greater, expenditure of time and money than most persons are able or willing to afford; and to obviate such difficulty has been the purpose of Mr. Manuder.

Mr. Manuder.

His plan has the nierit of completeness, and is undoubtedly the best that could have been desired.

He gives first a general sketch of uncient and modulity of the best that could have been desired. ern history—a rapid and comprehensive birds-eye view, as it were, of the rise and progress of nations, the most important incidents of their career, and their relations to each other; and after this he takes up the nations separately, furnishing a concise digest of all that is important or desirable to know concerning each, and thus affording a sort of key to the changes and events that were more briefly indicated, rather by their results than their incidents, in the general sketch or outline. Thus the salient the general sketch or outline. Thus the salient points of history are brought within a managable empass; and an excellent foundation is laid for more thorough and extensive reading in reference to

any portion of the world, or any epech of which a complete knowledge may be desired.

In the execution of this plan the author has been very successful. His notice of historical events, the brief, are lucid and satisfactory; and he traces the connection of effect and cause with singular acumen and generally with most convenents. and generally with most commendable freedom from partiality or bias; thus supplying a very good idea of the philosophy of history as well as the facts which history records. In a word, the work will be found invaluable to the general reader and a very useful

help to the student.

Complete in two volumes, large octavo, with engravings, \$4. An edition in paper covers, complete, suitable for mailing, \$3.

- Natural Principles by cleansing and purifying the body; it will be manifest, that if the constitution be not entirely exhausted—a persoverance in their use, according to directions, is absolutely certain to drive disease of every

name from the body.

When we wish to restore a swamp or morass to ertility, we drain it of the superabundant waters in like manner if we wish to restore the body to

ealth, we must cleanse it of impurity Wright's Indian Vegelable Pills will be found one of the best, if not the very best medicine in the world for carrying out this

Grand purifying principle, because they expel from the body all corrupt and impure humors, the cause of disease, in an easy and natural manner; and while they every day
