from 150 to 300 bushels per day No. 3 is 4 to 6 horse power, will thresh and clean Irom 100 to 200 hushele per day. These Machines are warranted to do the above,

and do it much better in every respect than any

other machine in use. Grain having much light filth in it cleaned on this Machine is worth from 2 to 3 cents more per bush-el than when cleaned on any other separator, or the common way of cleaning on hand fans. For this reason there is not the eighth part of light matter in the grain as when cleaned on the riddle principle. The blast acts freely on all the grain as it leaves the shues, whereas, when cleaned with riddle that adoantage is lost

This machine does not return the tailends as most of the separators do. By returning filthy tailends alternately it is impossible to make merchanta-grain, Another important feature in this machine that others of the kind have not, is the Self-acting Blast Regulator in the fan, which remedies all difficulties in bad cleaning, blowing grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power This Machine is also more durable and less tedious to manage than any other Separator and Cleaner,or the common machine with shaker.

Orders to insure their being filled until harvest should be sent in immediately.
