AND MACHINE

OF TINWARE, SHEET-IRON WARE, AND GEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER

> AND THE Latest Improved Thresher and Triple Geared Horse Powers, Driving either by Gear or Belt, all furnished Complete ready to be put on Wagons,

1, the undersigned, desire to call the attention o Farmers and Threshermen of Frankling and adjoin ing countles to it. This Machine has been before the public for seven years, during which time it has given general satisfaction, and the patentee having made some very important improvements having made some very important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of draught and fast threshing. It take pleasure in recommending it to the public, knowing that it will give the best of satisfaction. I am manufacturing three different sizes, as follows:

No. 1 is 8 horse Power, will thresh and clean from the public, I would invite all to a south solutions. The public is a south solution of the public, I would invite all to some a call, for then you can see for yourselves.

No. 2 is 5 to 6 hotse power, will thresh and clean from 150 to 300 bushels per day.

No. 3 is 4 to 6 horse power, will thresh and clean for new Stoves. from I00 to 200 hughele per day.

These Machines are warranted to do the above

and do it much better in every respect than any other machine in use. Grain having much light filth in it cleaned on this Machine is worth from 2 to 3 cents more per bushel than when cleaned on any other separator, or the common way of cleaning on hand fans. For this reason there is not the eighth part of light matter in the grain as when cleaned on the riddle principle. The blast acts freely on all the grain as it leaves the shues, whereas, when cleaned with riddle that ad-

oàntage is lost This machine does not return the tailends as most of the separators do. By returning filthy tailends alternately it is impossible to make merchantagrain, Another important feature in this machine that others of the kind have not, is the Self-acting Blast Regulator in the fan, which remedies all difficulties in bad cleaning, blowing grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power
This Machine is also more durable and less tedious
to manage than any other Separator and Cleaner, or the common machine with shaker.
Orders to insure their being filled until harvest
