GRAIN SEPARATOR, CLEANER AND BAGGER AND THE

Latest Improved Thresher and Triple Gear ed Horse Powers, Driving either by Gear or Belt, all furnished Complete

ready to be put on Wagons.

1, the undersigned, desire to call the attention o Farmers and Threshermen of Frankling and adjoin ing counties to h. This Machine has been before the public for aven years, during which time it has given general satisfaction, and the patentee

having made some very important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of commending it to the public, knowing that it will Office. give the hest of satisfaction. I am manufacturing

three different sizes, as follows:

three dillerent sizes, as tollows: No. 1 is 8 horse Power, will thresh and clean from 200 to 500 bushels per day. No. 2 is 5 to 6 horse power, will thresh and clean from 150 to 300 bushels per day. No. 3 is 4 to 6 horse power, will thresh and clean three 100 to 200 bushels per day.

from 100 to 200 hushels per day. These Machines are warranted to do the above, and do it much better in every respect than any

other machine in use. Grain having much light filth in it cleaned on this Machine is worth from 2 to 3 cents more per bush el than when cleaned on any other separator, or the common way of cleaning on hand fans. For this reason there is not the eighth part of light matter in the grain as when cleaned on the riddle principle

The blast acts freely on all the grain as it leaves the shues, whereas, when cleaned with riddle that advantage is lost This machine does not return the tailends as most of the separators do. By returning filthy tail-

ends alternately it is impossible to make merchanta-grain, Another important feature in this machine that others of the kind have not, is the Self-setting Blast Regulator in the fan, which remedies all difficulties in bad cleaning, blowing grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power

This Machine is also more durable and less tedious to manage than any other Separator and Cleaner, or the common machine with shaker. Orders to insure their being filled until harvest should be sent in immediately. I am fully prepared to make to order and on short
