WAYNESBORO
FOUNDRY
AND
MACHINE SHOP!

IMPORTANT TO WHEAT DROVERS

GEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGER
AND BAGER

Latest Improved Thresher and Triple Gear-ed Horse Powers, Driving either by Gear or Belt, all furnished Complete ready to be put on Wagons.

The undersigned, desiring to call the attention of Farmers and Threshermen of Franking and adjoining counties to this. This Machine has been before the public for seven years, during which time it has given general satisfaction, and the patentee having made some very important improvements which render it still more complete, both for clean separating and cleaning, and also for ease of draught and fast threshing. I take pleasure in recommending this to the public, knowing that it will give the best of satisfaction. I am manufacturing three different sizes, as follows:
 No. 1 is 8 horse power, will thresh and clean from 200 to 500 bushels per day.
 No. 2 is 5 to 6 horse power, will thresh and clean from 150 to 200 bushels per day.
 No. 3 is 4 to 5 horse power, will thresh and clean from 100 to 150 bushels per day.

These Machines are warranted to do the above, and do it much better in every respect than any other machine in use.
 Grain having much light chaff in it cleaned on this Machine is worth from 2 to 3 cents more per bushel than when cleaned on any other separator, or the common way of cleaning on hand bars. For this reason, to save the eight or ten cents per bushel in chaff as when cleaned on the hand bars, the black chaff freely on all the grain as it passes the shies, whereas, when cleaned with riddle instead of this machine, it does not return the tailends as most of the separators do. By returning filthy tailends alternately it is impossible to make merchantable grain. Another important feature in this machine that others of the kind have not, is the Self-acting Blast-Regulator in the fan, which remedies all difficulties in bad cleaning, blowing grain in the chaff in light wind or driving, which cannot be avoided in cleaning grain by horse power.
 This Machine is also more durable, and less tedious to manage than any other Separator and Cleaner, or the common machine with shaker.
 Orders to insure their being filled until harvest should be sent in immediately.
 I am fully prepared to make to order and on short notice Portable and Stationed

STEAM ENGINES,
GRIST AND SAW MILL GEARING,
SHAFTING AND PULLEYS,
IRON BRIDGES, CAST IRON WATER WHEELS, IRON KETTLES, &c.

Stoves and Plow castings, also cast iron and wrought iron pipe for steam or water, and Brass castings of every description; in a word, I am prepared to do everything usually done in a foundry and machine shop. Having supplied myself with the latest improved machinery, such as Lathes, Boring, Planing and Drilling Machines, persons can rely on having their work done in the most satisfactory manner. I am also prepared to manufacture to order machinery for wood, such as Tongs and Grooving machines for flooring, Surface, Tenon and Moulding machines, &c.

It also offers to the public a new and valuable improvement in my steam engines, made within the last year, viz: for the economizing of fuel, and the regulation of speed, which renders my new engines far superior to the old engines.
 All my machines are sold under warranty. My hands are all experienced workmen in this line of business, and I use all good material, so that I am perfectly safe in warranting all my work.
 I am also prepared to do repairing in workmanlike manner, on the shortest notice. Orders solicited and promptly attended to. All orders sent on for repairing must be accompanied with the cash.
 For terms and a circular describing my machinery, address
