### WAYNESBORO' FOUNDRY

AND

GRAIN SEPARATOR, CLEANER AND BAGGER

AND THE Latest Improved Thresher and Triple Geared Horse Powers, Driving either by Gear or Belt, all furnished Complete . 1 ready to be put on Wayons. .

1, the undersigned, desire to call the attention of Farmers and Thresbernen of Frankling and adjoining counties to it. This Machine has been before the public for seven years, during which time it has given general satisfaction, and the patentee having made some very important improvements which render it still more complete, both for clead draught and cleaning, and also for ease of draught and fast threshing. I take pleasure in recommending it to the public, knowing that it will give the best of satisfaction. I am manufacturing three different sizes, as follows:

No. 1 is 8 horse Power, will thresh and clean from 200 to 500 bushels per day.

No. 2 is 5 to 6 horse power, will thresh and clean

No. 2 is 5 to 6 horse power, will thresh and clean No. 3 is 4 to 6 horse power, will thresh and clean from 100 to 200 bushele per day.

These Machines are warranted to to the above and do it much better in every respect than any other machine in use.

Grain having much light filth in it cleaned on this

HE subscriber, thankful for past patronage, still Machine is worth from 2 to 3 cents more per bushe solicits the same; and in addition to manufactule than when cleaned on any other separator, or the gall kinds of worked common way of cleaning on hand fans. For this reason there is not the eighth part of light matter in the grain as when cleaned on the riddle principle. The blast acts freely on all the grain as it leaves the shues, whereas, when cleaned with riddle that advantage is lost

This machine does not return the tailends as most of the separators do. By returning filthy tailends afterhately it is impossible to make merchantagrain, Another important feature in this machine that others of the kind have not, is the Self-acting Store, Blast Regulator in the fan, which remedies all difficulties in bad cleaning, blowing grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power This Machine is also more durable and less tedious to manage than any other Separator and Cleaner, or the common machine with shaker.
