FOUNDRY

GEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER

AND THE Latest Improved Thresher and Triple Gear ed Horse Powers, Driving either by Gear or Belt, all furnished Complete ready to be put on Wayons.

1, the undersigned, desire to call the attention of Farmers and Threshermen of Frankling and adjoining counties to it. This Machine has been before the public for seven years, during which time it has given general satisfaction, and the patentee having made some very important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of draught and fast threshing. I take pleasure in recommending it to the public, knowing that it will give the best of satisfaction. I am manufacturing three different sizes, as follow No. 1 is 8 horse Power, will thresh and clean from

200 to 500 bushels per day. No. 2 is 5 to 6 horse power, will thresh and clean from 150 to 300 bushels per day
No. 3 is 4 to 6 horse power, will thresh and clean

from 100 to 200 bushels per day.
These Machines are warranted to do the above and do it much better in every respect than any other machine in use. Grain-having much light fifth in it cleaned on this Machine is worth from 2 to 3 cents more per bushe el than when cleaned on any other separator, or the common way of cleaning on hand fans. For this reason there is not the eighth part of light matter in the grain as when cleaned on the riddle principle. The blast acts freely onall the grain as it leaves the shues, whereas, when cleaned with riddle that ad-

vantage is lost This machine does not return the failends as most of the separators do. By returning filthy tail-ends alternately it is impossible to make merchanta-grain, Another important feature in this machine that others of the kind have not, is the Self-acting Blast Regulator in the fan, which remedies all difficulties in bad cleaning, blowing-grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power This Machine is also more durable and less tedious

to manage than any other Separator and Cleaner, or the common machine with shaker.

Orders to insure their being filled until harvest nould be sent in immediately. I am fully prepared to make to order and on short notice Portable and Stationed

STEAM ENGINES.
