YOUNG'S PATENT
FOUNDRY

MACHINE SHOP

GEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND SACKER

Latest Improved Thrasher and Triple Gear-ed Horse Powers, Driving either by Gear or Belt, all furnished Complete ready to be put on Wagons.

The undersigned, desiring to call the attention of Farmers and the proprietors of Farming and adjoining counties to it. This Machine has been before the public for several years, during which time it has given general satisfaction, and the patentee has made some very important improvements which render it still more complete, bold for clean draught and fast threshing. I take pleasure in recommending it to the public, knowing that it will give the best of satisfaction. I am manufacturing three different sizes, as follows:

No. 1 is 6 horse Power, will thresh and clean from 200 to 500 bushels per day.

No. 2 is 8 to 10 horse Power, will thresh and clean from 150 to 300 bushels per day.

No. 3 is 4 to 6 horse Power, will thresh and clean from 100 to 200 bushels per day.

These Machines are warranted to do the above and do it much better in every respect than any other machine in use.

Grain having much light chaff in it cleaned on this Machine is worth from 2 to 3 cents more per bushel than that cleaned on any other separator. For this reason it is not the eighth part of light matter in the grain as when cleaned on the riddle principle. The blast acts freely upon the grain as it leaves the shoes, whereas, when cleaned with riddle that advantage is lost.

This machine does not return the tailends as most of the separators do. By returning fifty tailends alternately it is impossible to make mercantile grain. Another important feature is the Self-acting Blast Regulator in the fan, which remedies all difficulties in bad cleaning, blowing grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power.

This Machine is also more durable, and less tedious to manage than any other separator and Cleaner of the common machine with shaker.

Orders to meet their being, I am filling until harvest should be sent in immediately.

I am fully prepared to make to order and on short notice Portable and Stationed

STEAM ENGINES,
GRIST AND SAW MILL GEARING,
SHAFTING AND PULLEYS,
IRON BRIDGES, CAST IRON WATER

WHEELS, IRON KETTLES, &c.

Stoves and Flow castings, cast iron and wrought iron pipe for steam or water; and Brass castings of every description in a work. I am prepared to do everything usually done in a foundry and machine shop. Having supplied myself with the latest improved machinery, such as Lathes, Boring, Planing and Drilling Machines, persons can rely on having their work done in the most satisfactory manner.

I am also prepared to manufacture to order machinery of every kind, such as Tanning and Grooving machines for flooring, Surface, Tenon and Moulding machines, &c.

I also offer to the public a new and valuable improvement in my steam engines, made within the last year, viz: for the economizing of fuel, and the regulation of speed, which renders my new engines far superior to the old engines.

All my machines are sold under warranty. My motto is to give satisfaction in every line of business, and I use all good material, so that I am perfectly safe in warranting all my work.

I am also prepared to do repairing in workmanlike manner, on the shortest notice. Orders solicited and promptly attended to. All orders sent in or repairing must be accompanied with the cash.

For particulars and circulars descriptive of machine, address
