I, the undersigned, desire to call the attention to Farmers and Threshermen of Frankling and adjoining counties to it. This Machine has been before the public for seven years, during which time it the public for seven years, during which time at has given general antisfaction, and the patentee having made some very important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of draught and fast threshing. I take pleasure in recommending it to the public, knowing that it will give the best of satisfaction. I am manufacturing three different sizes, as follows:

No. 1 is 8 horse Power, will thresh and clean from

200 to 500 bushels per day.

No. 2 is 5 to 6 horse power, will thresh and clean from 150 to 300 bushels per day.

No. 3 is 4 to 6 horse power, will thresh and clean from 100 to 200 bushels per day. These M.chines are warranted to do the above

and do it mak better in every respect than any other machice in use. Grain having much light filth in it cleaned on this Machine is worth from 2 to 3 cents more per bushe el than when cleaned on any other separator, or the

common way of cleaning on hand fans. For this reason there is not the eighth part of light matter in the grain as when cleaned on the riddle principle. The blast acts freely onall the grain as it leaves the shues, whereas, when cleaned with riddle that ad-

vantage is lost.
This machine does not return the tailends as most of the separators do. By returning fifthy tailends alternately it is impossible to make merchantagrain, Another important feature in this machine that others of the kind have not, is the Self-acting Blast Regulator in the fair, which remedies all difficulties in bad cleaning, blowing grain in the chall in high speed or irregular diving, which cannot be avoided in cleaning grain by horse power This Machine is also more durable and less tedious

to manage than any other Separator and Cleaner or the common machine with shaker. Orders to insure their being filled until harvest

should be sent in immediately.

I am fully prepared to make to order and on short notice Portable and Stationed
