WAYNESBORO FOUNDRY

PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER

AND THE Latest Improved Thresher and Triple Gear ed Horse Powers, Driving either by Gear or Belt, all furnished Complete

ready to be put on Wagons.

I, the undersigned, desire to call the attention to Farmers and Threshermen of Frankling and adjoin ing counties to it. This Machine has been before the public for seven years, during which time it has given general satisfaction, and the patentee having made some very important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of draught and fast threshing. I take pleasure in re-commending it to the public, knowing that it will give the best of satisfaction. I am manufacturing

three different sizes, as follows: No. 1 is 8 horse Power, will thresh and clean from

200 to 500 bushels per day.

No. 2 is 5 to 6 horse power, will thresh and clear from 150 to 300 bushels per day. No. 3 is 4 to 6 horse power, will thresh and clean

from 100 to 200 bushele per day.

These Machines are warranted to do the above and do it much better in every respect than any other machine in use.

Grain having much light filth in it cleaned on this Machine is worth from 2 to 3 cents more per bushe el than whom cleaned on any other separator, or the

the grain as when cleaned on the riddle principie. The blast acts freely onall the grain as it leaves the shues, whereas, when cleaned with riddle that advantage is lost

This machine does not return the tailends as most of the separators do. By returning filthy tailends alternately it is impossible to make merchantagrain, Another important feature in this machine that others of the kind have not, is the Self-acting Blast Regulator in the fan, which remedies all dif-ficulties in bad cleaning, blowing grain in the chaft in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power This Machine is also more durable and less tedious to manage than any other Separator and Cleaner, or

the common machine with shaker.

Orders to insure their being filled until harvest should be sent in immediately. I am fully prepared to make to order and on shore

notice Portable and Stationed STEAM ENGINES.

GRIST AND SAW MILL GEARING,

SHAFTING AND PULLEYS, IRON BRIDGES, CAST IRON WATER WHEELS, IRON KETTLES, &c.

Stoves and Plow castings, also cast from and wrough iron pipe for steam or water, and Brass castings of every description; in a word, I am prepared to do everything usually done in a foundry and machine shop. Having supplied myself with the latest im-proved machinery, such as Lathes, Boring, Planing and Drilling Machines, persons can rely on having their work done in the most satisfactory manner .-I am also prepared to manufacture to order machinery for wood, such as Tonging and Groving have for sale machines for flooring, Surface; Tenout and Mould

ing machines, &c. also offer to the public a new and valuable improvement in my steam engines, made within the last year, viz: for the economizing of fuel, and the regulation of speed, which renders my new engines far superior to the old engines. All my machines are sold under warrantee. My hands are all experienced workmen in this line o

pusiness, and I use all good material, so that I am perfectly safe in warranting all my work. I am also prepared to do repairing in workman like manner, on the shortest notice. Orders solicited and promptly attended to. All orders sent in or repairing must be accompanied with the cash. For particulars and circulars descriptive of machine, address GEORGE FRICK Or DANIEL GEISER, Proprietor of Territory and so-icetor of orders, Waynesboro' Franklin Co. Pa.
