FOUNDRY AND

GRAIN SEPARATOR, CLEANER AND BAGGER

Latest Improved Thresher and Triple Gear-ed Horse Powers, Driving either by Gear or Belt, all furnished Complete ready to be put on Wagons.

1, the undersigned, desire to call the attention of 1, the undersigned, desire to call the attention of Farmers and Threshermen of Frankling and adjoining counties to it. This Machine has been before the public for seven years, during which time it has given general satisfaction, and the patentee having made some yery important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of draught and fast threshing. I take pleasure in recommending it to the public, knowing that it will give the best of satisfaction. I am manufacturing three different sizes, as follows: three different sizes, as follows: No. 1 is 8 horse Fower, will thresh and clean from

200 to 500 bushels per day. No. 2 is 5 to 6 horse power, will thresh and clean from 150 to 300 bushels per day
No. 3 is 4 to 6 horse power, will thresh and clean

Irom 100 to 200 bushele per day.
These Machines are warranted to do the above and do it much better in every respect than any other machi e in use... Grain having much light filth in it cleaned on this Machine is worth from 2 to 3 cents more per bushe el than who cleaned on any other separator, or the common way of cleaning on hand fans. For this reason there is not the eighth part of light matter in the grain as when cleaned on the riddle principle. The blast acts freely onall the grain as it leaves the shues, whereas, when cleaned with riddle that ad-

vantage is lost This machine does not return the tailends a most of the separators do. By returning filthy tailends alternately it is impossible to make merchantagrain, Another important feature in this machine that others of the kind have not, is the Self-acting Blast Reg'dlator in the fan, which remedies all disficulties in bad cleaning, blowing grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power This Machine is also more durable and less tedious to manage than any other Separator and Cleaner, or

the common machine with snaker. Orders to msure their being filled until harvest should be sent in immediately. I am fully prepared to make to order and on short notice Portable and Stationed

Having supplied myself with the latest im-proved machinery, such as Lathes, Boring, Planing and Drilling Machines, persons can rely on having their work done in the most satisfactory manner .-I am also prepared to manufacture to order ma-chinery for wood, such as Tenging and Groving machines for flooring, Surface, Tenout and Mould-

ing machines. &c. I also offer to the public a new and valuable improvement in my steam engines, made within the last year, viz: for the economizing of fuel, and the regulation of speed, which renders my new engines far superior to the old engines. All my machines are sold under warrantee. My hands are all experienced workmen in this line o

pusiness, and I use all good material, so that I am perfectly safe in warranting all my work. I am also prepared to do repairing in workman like manner, on the shortest notice.
