FOUNDRY

AND

GRAIN SEPARATOR, CLBANER AND BAGGER

AND THE Latest Improved Thresher and Triple Gear

ed Horse Powers, Driving either by Gear or Belt, all furnished Complete ready to be put on Wagons.

I, the undersigned, desire to call the attention of Farmers and Threshermen of Frankling and adjoin-ing counties to it. This Machine has been before the public for seven years, during which time it has given general satisfaction, and the patentee has given general satisfaction, and the patentee having made some very important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of draught and fast threshing. I take pleasure in recommending it to the public, knowing that it will give the best of satisfaction. I am manufacturing three different sizes, as follows:

No. 1 is 8 herse Power will thread and clean from

No. 1 is 8 horse Power, will thresh and clean from 200 to 500 bushels per day.

No. 2 is 5 to 6 horse power, will thresh and crean from 150 to 300 bushels per day

No. 3 is 4 to 6 horse power, will thresh and clear from 100 to 400 husbele per day. These M chines are warranted to do the above

and do it man h better in every respect than any other macht e in use. Grain having much light filth in it cleaned on this Machine is worth from \$ 12, 3 cents more per bushe el than when cleaned on any other separator, or the common way of cleaning on hand fans. For this reason there is not the eighth part of light matter in the grain as when cleaned on the riddle principle. The blast acts freely onall the grain as it leaves the

shues, whereas, when cleaned with raddle that ad vantage is lost— This machine does not return the tailends as most of the separators do. By returning filthy tailends alternately it is impossible to make merchantagrain, Another important feature in this machine that others of the kind flave not, is the Self-acting Blast Reg ulator in the fan, which remedies all difficulties in bad cleaning, blowing grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power This Machine is also more durable and less tediou

to manage than any-other-Separator-and-Cleaner,o the common machine with shaker. Orders to insure their being filled until harves should-be-sent-in-immediately.

I am fully prepared to make to order and on short notice Portable and Stationed STEAM ENGINES.

GRIST AND SAW MILL GEARING, SHAFTING AND PULLEYS.

IRON BRIDGES, CAST IRON WATER

WHEELS, IRON KETTLES, &c. Stoves and Plow castings, also cast iron and wrought iron pipe for steam or water, and Brass castings of every description; in a word, I am prepared to do everything usually done in a foundry and machine shop. Having supplied myself with the latest improved machinery, such as Lathes, Boring, Planing and Drilling Machines, persons can rely on having their work done in the most satisfactory manner.— I am also prepared to manufacture to order ma-chinery for wood, such as Tonging and Groving machines for flooring, Surface, Tenout and Mould-

ing machines, &c. I also offer to the public a new and valuable improvement in my steam engines, made within the last year, viz: for the economizing fuel, and the regulation of speed, which renders my new engines for superior to the old engines.

All my machines are sold under warrantee. My hands are all experienced workmen in this line o

pusiness, and I use all good material, so that I am perfectly safe in warranting all my work. I am also prepared to do repairing in workman like manner, on the shortest notice. Orders solicited and promptly attended to. All orders sent in or repairing must be accompanied with the cash.
For particulars and circulars descriptive of machine, address

GEORGE FRICK Or DANIEL GEISER, Proprietor of Territory and so-licetor of orders, Waynesboro' Franklin Co. Pa. April 18—tf
