WAYNESBORO'

FOUNDRY

AND

GEISER'S PATENT SELF-REGULATING

GRAIN SEPARATOR, CLEANER AND BAGGER

Latest Improved Thresher and Triple Gear ed Horse Powers, Driving either by Gear or Belt, all furnished Complete ready to be put on Wagons.

1, the undersigned, desire to call the attention of Farmers and Threshermen of Frankling and adjoining counties to it. This Machine has been before the public for seven years, during which time it has given general satisfaction, and the patentee having made some very important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of draught and fast threshing. I take pleasure in re-commending it to the public, knowing that it will give the best of satisfaction. I am manufacturing three d.fferent sizes, as follows:

No. 1 is 8 horse Power, will thresh and clean from 200 to 500 bushels per day. No. 2 m 5 to 6 horse power, will thresh and crean

from 150 to 300 bushels per day No. 3 is 4 to 6 horse power, will thresh and clean from 100 to 400 bushele per day.

These M chines are warranted to do the above and do it m h better in every respect than any other macht\_c in use. Grain ha ing much light filth in it cleaned on this Machine is worth from 2 to 3 cents more per bushe el than whill cleaned on any other separator, or the common way of cleaning on hand fans. For this reason ther is not the eighth part of light matter in the grain as when cleaned on the raddle principle. The blast acts treely onall the grain as it leaves the

shues, whereas, when cleaned with riddle that advantage is lost This machine does not return the tailends as most of the separators do. By returning fifthy tail-ends alternately it is impossible to make merchanta-grain, Another important feature in this machine that others of the kind have not, is the Self-acting Blast Regulator in the fan, which remedies all dilficulties in bad-cleaning, blowing grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by hoise power. This Machine is also more durable, and less tedious

to manage than any other Separator and Cleaner, or the common machine with shaker. Orders to insure their being filled until harvest should be sent in immediately.

I am fully prepared to make to order and on short notice Portable and Stationed STEAM ENGINES. GRIST AND SAW MILL GEARING,

SHAFFING AND PULLEYS, IRON BRIDGES, CAST IRON WATER

WHEELS, IRON KETTLES, &c. Stoves and Plow castings, also cast fron and wrought iron pipe for steam or water, and Brass castings of description; in a word, I am prepared to do everything usually done in a foundry and machine shop. Having supplied myself with the latest im-proved machinery, such as Lathes, Boring, Planing and Drilling Machines, persons can rely on having their work done in the most satisfactory manner. I am also prepared to manufacture to order machinery for wood, such as Tonging and Groving muchines for flooring, Surface, Tenout and Mould-

ing machines, &c. I also offer to the public a new and valuwithin the last year, viz: for the economizing of fuel, and the regulation of speed, which renders my

new engines far superior to the old engines. All my machines are sold under warrantce. My hancs are all experienced workmen in this line o puriness, and I use all good material, so that I am perfectly sale in warranting all my work.

I am also prepared to do repairing in workman like manner, on the shortest notice. Orders solicited and promptly attended to. All orders sent in or repairing must be accompanied with the cash. For particulars and circulars descriptive of ma-chine, address GEORGE PRICK Or DANIEL GEISER, Proprietor of Territory and solicetor of orders, Waynesboro' Franklin Co. Pa.

## ANTINTAM PACTORY
