WAYNESBORO' FOUNDRY

MACHINE

BEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER

Latest Improved Thresher and Triple Geared Horse Powers, Driving either by Gear or Belt, all furnished Complete ready to be put on Wayons.

1, the undersigned, desire to call the attention of Farmers and Threshermen of Frankling and adjoining counties to it. This Machine has been before the public for seven years, during which time it has given general satisfaction, and the patentee having made some very important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of separating and cleaning, and also for ease of draught and fast threshing. I take pleasure in recommending it to the public, knowing that it will give the best of satisfaction. I am manufacturing three-different sizes, as follows:

No. 1 is 8 horse Power, will thresh and clean from 200-to-509 bushels per day. No. 2 is 5 to 6 horse power, will thresh and clean

from 150 to 300 bushels per day No. 3 is 4 to 6 horse power, will thresh and clean from 100 to 200 hashele per day.

These M. chines are warranted to do the above

and do it mach better in every respect than any other machine in usc. Grain having much light filth in it cleaned on this Mochine is worth from 2 to 3 cents more per bushe el than while cleaned on any other separator, or the common way of cleaning on hand fans. For this reason there is not the eighth part of light matter in the grain as when cleaned on the suddle principle. the tarmers, drovers, &c., that he has on hand an The blast acts freely onall the grain as it leaves the shues, whereas, when cleaned with riddle that ad-

Fantage is lost This machine does not return the tailends as most of the separators do. By returning fifthy tailends alternately it is impossible to make merchantagrain, Another important leature in this macline that others of the kind have not, is the Seit-acting Blast Regulator in the fan, which remedies all difficulties in bad cleaning, blowing grain in the chaft in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power. This Machine is also more durable, and less tedious

to manage than any other Separator and Cleaner,or Orders to moure their being filled until harvest hould be sent in immediately. I am fully prepared to make to order and on short notice Portuble and Stationed

STEAM ENGINES

GRIST AND SAW MILL GEARING, SHAFTING AND PULLEYS,

IRON BRIDGES, CAST IRON WATER

WHEELS, IRON KETTLES, &c. Stoves and Plow castings, also cast iron and wrought iron pipe for steam or water, and Brass castings of every description; in a word, I am prepared to do everything usually done in a foundry and machine shop. Having supplied myself with the latest imshop. Having supplied myself with the latest im-proved machinery, such as Lathes, Boring, Planing and Drilling Machines, persons can rely on having their work done in the most satisfactory manner .-I am also prepared to manufacture to order mawood, such as Tonging and Groving machines for flooring, Surface, Tenout and Mould-

ing machines, &c. also offer to the public a new and valuable improvement in my steam engines, made within the last year, viz: for the economizing of tuel, and the regulation of speed, which renders my new engines far superior to the old engines. All my machines are sold under warrantee. My hands are all experienced workmen in this line o pusmess, and I use all good material, so that I am

perfectly sale in warranting all my work. \_1 am also prepared to do repairing in workman like manner, on the shortest notice. Orders solicited and promptly attended to. All orders sent in or repairing must be accompanied with the cash.
For particulars and circulars descriptive of machine, address GEORGE FRICK Or DANIEL GEISER, Proprietor of Territory and so-licetor of orders, Waynesboro' Franklin Co. Pa. April 18-tf
