FOUNDRY ND

WAYN SBORO'

MACHINE

SELF-REGULATING GEISER'S PATENT GRAIN SEPARATOR, CLEANER AND BAGGER

Latest Improved Thresher and Triple Geared Horse Powers, Driving either by Gear or Belt, all furnished Complete. ready to be put on Wayons.

1, the undersigned, desire to call the attention of Farmers and Threshermen of Frankling and adjoining counties to it. This Machine has been before the public for seven years, during which time it has given general satisfaction, and the patentee having made some very important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of draught and fast threshing. I take pleasure in re-commending it to the public, knowing that it will give the best of satisfaction. I am manufacturing hree different sizes, as follows: No. 1 is 8 horse Power, will thresh and clean from

200 to 500 bushels pel day. No. 2 is 5 to 6 horse power, will thresh and crean from 150 to 300 bushels per day

No. 3 is 4 to 6 horse power, will thresh and clean from 100 to 200 bushele per day.
These M.chines are warranted to do the above and do it mach better in every respect than-any

other mach: e in use. Grain having much light filth in it cleaned on this Machine is worth from 2 to 3 cents more per bushe el than what cleaned on any other separator, or the common way of cleaning on hand fans. For this reason there is not the eighth part of light matter in the grain as when cleaned on the riddle principle. The blast acts freely onall the grain as it leaves the shues, whereas, when cleaned with raddle that ad-

vantage is lost This machine does not return the tailends as most of the separators do. By returning fifthy tailends alternately it is impossible to make merchantagrain, Another important feature in this machine that others of the kind have not, is the Self-acting Blast Regulator in the fan, which remedies all difficulties in bad cleaning, blowing grain in the chat in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power

This Machine is also more durable, and less tedious to manage than any other Separator and Cleaner,o the common machine with shaker. Orders to insure their being filled until harvest

should be sent in immediately. I am fully prepared to make to order and on short notice Portuble and Stationed

STEAM ENGINES. GRIST AND SAW MILL GEARING,

SHAFTING AND PULLEYS,

IRON BRIDGES, CAST IRON WATER WHEELS, IRON, KETTLES, &c,

Stoves and Plow castings, also cast from and wrought iron pipe for steam or water, and Brass castings of every description; in a word, I am prepared to do everything usually done in a foundry and machine Having supplied myself with the latest improved machinery, such as Lathes, Boring, Planing and Drilling Machines, persons can rely on having their work done in the most satisfactory manner .-I am also prepared to manufacture to order machinery for wood, such as Tonging and Groving machines for fluoring, Surface, Tenout and Mould

ing machines, &c.

I slo offer to the public a new and valu improvement in my steam engines, made within the last year, viz: for the economizing of fuel, and the regulation of speed, which renders my new engines far superior to the old engines.

All thy machines are sold under warrantee. My

hand are all experienced workmen in this line o pusinces, and I use all good material, so that I am perfectly safe in warranting all my work. Ism also prepared to do repairing in workman

like manner, on the shortest notice. Orders solicited and promptly attended to. All orders sent in or regaining must be accompanied with the cash. For particulars and circulars descriptive of ma chinė, address GEORGÉ FRICK Or DANIEL GEIBER, Proprietor of Territory and solictor of orders, Waynesboro' Franklin Co. Pa. April, 18---tf
