1, the undersigned, desire to call the attention of Farmers and Threshermen of Frankling and adjoining counties to it. This Machine has been before the public for seven years, during which time it has given general satisfaction, and the patentee having made some very important improvements which render it still more complete, both for clead separating and cleaning, and also for ease of draught and fast threshing. I take pleasure in recommending it to the public, knowing that it will give the best of satisfaction. I am manufacturing three different sizes as follows:

other machine in use. Grain having much light filth in it cleaned on this

vantage is lost

The machine does not return the tailends as
most of the separators do. By returning filthy tailends alternately it is impossible to make merchantagrain. Another important feature in this machine that others of the kind have not, is the Self-acting Blast Regulator in the fan, which remedies all difficulties in bad cleaning, blowing grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power This Machine is also more durable and less tedious

to manage than any other Separator and Cleaner, or the common machine with shaker.
Orders to insure their being filled until harvest hould-be sent in immediately. I am fully prepared to make to order and on shor notice Portable and Stationed
