WAYNESBORO' FOUNDRY

AND MACHINE SHOP!

IMPORTANT TO WHEAT GROWERS!

GEISEN'S PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAGGER AND THE Latest Improved Thresher and Triple Gear-ed Horse Powers, Driving either by Gear or Belt, all furnished complete ready to be put on Wagons!

I, the undersigned, desire to call the attention of Farmers and Threshermen of Franklin and adjoining counties to it. This machine has been before the public for eight years, during which time it has given general satisfaction; and the patentee having made some very important improvements, which render it still more complete, both for clean separating and cleaning, and also for the ease of draught and fast threshing - I take pleasure in recommending it to the public, knowing that it will give the best satisfaction. I am manufacturing three different sizes, viz:

No. 1 is 6-horse Power; will thresh and clean from 800 to 900 bushels per day. No. 2 is 5 to 6-horse power, will thresh and clean from 150 to 300 bushels per day. No. 3 is 4 to 5-horse power, will thresh and clean from 100 to 200 bushels per day.

These Machines are warranted to do the above, and do it much better in every respect than any other machine in use. Grain having much light chaff in it cleaned on this Machine is worth from 2 to 3 cents more per bushel than when cleaned on any other separator, or the common way of cleaning on hand fans. For this season there is not the eighth part of light matter in the grain as when cleaned on the riddle principle. The blast acts freely on all the grain, leaving these husks, chaff, when cleaned with riddle that advantage is lost.

This machine does not return the tails as most of the separators do. By returning fifty tail ends alternately it is impossible to make merchantable grain. Another important feature in this machine that others of the kind have not, is the Self-acting Blast Regulator in the fan, which remedies all difficulties in hand-cleaning, blowing grain in the chaff in high speed or irregular driving, which cannot be avoided in cleaning grain by horse power.

This Machine is also more durable and less tedious to manage than any other Separator and Cleaner, or the common machine with shaker. Orders to insure their being fitted until harvest should be sent in immediately.

I am fully prepared to make to order and on short notice Portable and Stationed STEAM ENGINES, GRIST AND SAW MILL GEARING, SHAFTING AND PULLEYS, IRON BRIDGES, CAST IRON WATER WHEELS, IRON KETTLES, &c.

Stoves and Flow castings, also cast iron and wrought iron pipe for steam or water, and Brass castings of every description; in a word, I am prepared to do everything usually done in a foundry and machine shop. Having supplied myself with the latest improved machinery, such as Lathes, Boring, Planing and Drilling Machines, persons can rely on having their work done in the most satisfactory manner. I am also prepared to manufacture to order machinery for wood, such as Tonging and Grooving machines for flooring, Surface, Tenout and Moulding machines, &c.

I also offer to the public a new and valuable improvement in my steam engines, made within the last year, viz: for the economizing of fuel, and the regulation of speed, which renders my new engines far superior to the old engines. All my machines are sold under warranty. My hands are all experienced workmen in this line of business, and I use all good material, so that I am perfectly safe in warranting all my work.

I am also prepared to do repairing in workmanlike manner, on the shortest notice. Orders solicited and promptly attended to. All orders sent in or repaired must be accompanied with the cash. For particulars and circulars descriptive of my machine, address GEORGE FRICK, Or DANIEL GASSAN, Proprietor of Territory and solicitor of orders, Waynesboro' Franklin Co. Pa. April 18 - 1y
