Improved Thrashing Machine! PRICE & HOLF!

Farmers will please look at the great advantage in Thrashing Grain with

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR

CLEANER AND BAGGER.

At a time like the present, when labor is very scarce, it is important that farmers who are interested should give attention to the above improvement, which will considerably reduce the expense of threshing

grain over the common way.

This machine has been before the public for a number of years, but not very widely circulated, although it has competed with all the best of the different patented Grain Separators, and proved a decided advantage, and now has the reputation of being the best Separator ever before the public. In order to prove this in new neighborhoods where it is not known, I am willing to forward a machine for a test to any person desiring a trial, and have its merits tested; and I wish to have it understood that I put the machine upon its own merits, and want farmers to judge for themselves. If it does not fully meet their wants and they do not wish to purchase, I am perfectly willing to bear all expenses of shipping.

The machine is particularly adapted to farmers for their own use, and will apply to lever or railway power, will thresh and clean, in good grain, from 100 to 150 bushels per day, using four to six hordes and the same numifier hands, but under very favorable circumstances will thresh more per day.

It cleans the grain thoroughly clean by one operation, which is not generally done by other Separators.

Grain cleaned on this machine, with much light filthy matter, is worth one or two cents more per bushelt than if cleaned in the common way. There is also a great saving of grain, in straw and chaff over

the common way of thrashing and cleaning, and also over other Separators and Cleaners. The machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half the trouble in a barn floor as and effectual remedy in the known world for the pubpermanent cure of Dyspepsia and Debility, and as the common thresher and shaker. It is also easily put in operation, being simple, easily managed, reliations offered to the pubble, durable, compact, and cleanly to work by while in operation, not making near the dust as the com-

mon machine or other Separators. Far ners can rest assured that this machine is no humbug, and judging from the high recommendation the cork of every bottle. The very fact that others want and will have as soon as they have an opportunity to appreciate and attest its merits, which I hope are attempting to imitate this valuable remedy, they will give me an opportunity as I am willing to be responsible as already stated from farmers that are using them, I must come to the conclusion that it is the very machine that farmers they will give me an opportunity, as I am willing to be responsible, as already stated,

Price of Machine at Shop, (all complete, ready to attach to belt Lever or Railway Power,) \$1,75 cash, \$180 in three months, with interest from date. As material for manufacturing advances, there may be a corresponding advance in the price of ma-

hines. The machine is fully represented in the above cut. I warrant the machine to do as above represented. Orders solicited and promptly attended to. The machine is manufactured in Pennsylvania and Maryland, at different shops. For further information and description of machine, address

DANIEL GEISER, Proprietor, Waynesboro', Franklin County, Penna.

Sep. 23-tf.7 Waynesboro Foundry

GEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR, CLEANER AND BAG-GER. AND THE LATEST IMPROVED THRESHER AND TRIPPLE GEARED HORSE POWERS, DRIVING EITHER BY GEAR OR BELT, ALL FURNISHED COMPLETE, READY TO PUT ON WAGONS.

I, the undersigned, desire to call the attention of Farmers and Threshermen of Franklin and adjoining counties to this machine. It has been before the public for a number of years, during which time it has given general satisfaction, and the patentee has made some very important improvements which render it still more complete, both for clean separating and cleaning, and also for the ease of draught and fast threshing. I take pleasure in recommending it to the public knowing that it will give the best satis-

faction. I am manufacturing two sizes, viz : The largest is eight-horse power and will thresh and clean from 200 to 500 bushels per day. The small size. See the above which fully represents the machine, also full description, price, &c., of Persons wishing machines should send in their orders in reasonable time to insure their being
