Improved Thrashing Machine ! PRICE & HORFLICH'S

Farmers will please look at the great advantage in Thrashing Grain with

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR CLEANER AND BAGGER.

At a time like the present, when labor is very scarce, it is important that farmers who are interested should give attention to the above improvement, which will considerably reduce the expense of threshing grain over the common way.

This machine has been before the public for a number of years, but not very widely circulated, al-though it has competed with all the best of the different patented Grain Separators, and proved a decid-ed advantage; and now has the reputation of being the best Separator ever before the public. In order to prove this in new neighborhoods where it is not known, I am willing to forward a machine for a test

to prove this in new neighborhoods where it is not known, I am willing to forward a machine for a test to any person desiring a trial, and have its merits tested; and I wish to have it understood that I put the machine upon its own merits, and want farmers to judge for themselves. If it does not fully meet their wants and they do not wish to purchase, I am perfectly willing to bedr all expenses of shipping. The machine is particularly adopted to farmers for their own use, and will apply to lever or railway power, will thresh and clean, in good grain, from 100 to 150 bushels per day, using four to six horses and the same number hands, but under very favorable circumstances will thresh more per day. It cleans the grain thoroughly clean by one operation, which is not generally done by other Separators. Grain cleaned on this machine, with threch light filling matter, is worth one or two cents more per bush-el than if cleaned in the common way. There is also a great saving of grain, in straw and chaff over the common way of thrashing and cleaning, and also over other Separators and Cleaners. The machine is conveniently arranged for having and threshing, being permanently fixed on two wheels. One man can easily move or shift if about, so that it is not half the troble in a barn floor as the common thresher and shaker. It is also easily put in operation, being simple, easily managed, telia-

the common thresher and shaker. It is also easily put in operation, being simple, easily managed, reliable, durable, compact, and cleanly to work by while in operation, not making near the dust us the common machine or ot ler Sevarators.

Far ners cart rest assured that this machine is no humbug, and judging from the high recommendation from farmers that are using them, I must come to the conclusion that it is the very machine that farmers from farmers that are using them, I must come to the conclusion that it is the very machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, which I hope they will give me an opportanity, as I am willing to be responsible, as already stated, Price of Machine at Shop, (all complete, ready to attach to belt Lever or Railway Power,) \$1,75 cash, \$180 in three months, with interest from date.

As material for manufacturing advances, there may be a corresponding advance in the price of ma chines. The machine is fully represented in the above cut. I warrant the machine to do as above represented. Orders soficited and promptly attended to. The machine is manufactured in Pennsyltania and Maryland, at different shops

For further information and description of machine, address DANIEL GEISER, Proprietor,

has given general satisfaction, and the patientee has made some very important improvements which ren-der it still more complete, both for clean separating and cleaning, and also for the ease of dratght and fast threshing. I take pleasifie in recommending if to the public knowing that it will give the first satis-faction. I am manufacturing the size of the same set of the same

The income and the probability two sizes, viz: The largest is eight-horse power and will thresh and clean from 200 to 500 bushels per day. The sm all size. See the above which fully represents the machine, also full description, price, &c., of machine. Persons wishing machines should send iff their ofders in reasonable time to insure their being Stud
