MARCHING SONG OF UNCLE SAMISBLACK BOYS. The following is the ditty sung by Uncle Sam' Colored Infantry on their mar. h into and through Petersburg. Though not in all classic in its diction it is quite expressive: Say, darkies, hab you seen do mains,

Wid de muffstash on his face Go 'long de road some time dis mornin', Like he's goin' to leave de place! He seen de smoke way up de ribber Where de Linkum gunboats lay; He took his hat and left berry sudden, And I 'spose he's runned away, De massa run, ha! ha! De darkies stay, ho! ho! It must be now de bingdom comini An' de yar ob Jubilo.

He's six foot one way and four foot todder, An' he weighs six hundred poun', His coat so big he couldn't pay de tailor, An' it won't reach half way roun', He drills so much dey calls him cap'n, An' he gits so mighty tann'd, I speck he'll try and fool dem Yankeer For to tink he's contraband, De massa run, ha! ha! De darkeys stay, ho! ho! It must be now de kingdom comin', An' de yar ob Jubilo.

DON'T DESPISE "SMALL THINGS."-Some years ago, a gentleman visiting a larmer took from his pocket a small potato, which some how had got in there at home. It was thrown out with a smile, and the farmer taking it in hand to look at it, a curious little boy of twelve, standing at his elbow asked him what it was. "Oh," said he, "nothing but a potato, my boy; take it and plant it, and you can have all that you can raise from it till you are free." The lad took it, and the farmer thought no more about it at the time. The product was carefully put aside in the fall and planted in the spring and so on till the tourth year, when, the yield being-good, the actual product was four hundred bushels. The farmer, seeing the prospect that the potato field would by another year covet his whole tarm, asked to be re-leased from his promise. Let us not despise small things.

"THE WAY YOU ALWAYS STOPPED."-The Vermont Record tells a good story of an innocent old lady, who never before had "rid on a railroad," who was passenger on one of the Vermont railroads at the time of a recent collision, when a freight train, smashing one of the cars, killed several passengers, and upset things generally. As soon as he could recover his scattered senses, the conductor went in search of the venerable dame, whom he found sitting solitary and alone in the car (the other passengers having sought terra firma,) with a very placid expression of countenance, notwithstanding she had made a complete summersault over the seat in front, and her bandbox and bundle had gone unceremoniously down the passage way. "Are you hurt?" inquired the conductor.

"Hurt ! why?" said the old lady. "We have just-been run into by a freight train, two or three passengers have been kil-

led and several others severely injured," "Law me! I didn't know but that was the way you always stopped."

STRETCH IT A LETTLE -A little girl and her little brother were on their way to the grocer's the other mroning. The roots of the houses and the grass on the common were white with frost, and the wind was sharp .---They were both poorly clad, but the little gill had a coat over her, which she seemed Dry

should give attention to the above improvement, which will considerably reduce the expense of threahing grain over the common way. This machine has been before the public for a number of years, but not very widely circulated, al-though it has competed with all the best of the different patented Grain Separators, and proved a decid-ed advantage, and now has the reputation of being the best Separator ever before the public. In order to prove this in new neighborhoods where it is not known, I am willing to forward a machine for a test to any person desiring a trial, and have its merits tested; and I wish to have it understood that I put the machine upon its own merits, and want farmers to judge for themselves. If it does not fully meet their wanks and they do not wish to purchase, I am perfectly walling to bear all expenses of shipping. The machine is particularly adapted to farmers for their own use, and will apply to lever or railway power, will thresh and clean, in good grain, from 100 to 150 bushels per day, using four to six horses and the same number hands, but under very favorable circumstances will thresh more per day. It cleans the grain thoroughly clean by one operation, which is not generally done by other Separators. Grain cleaned on this machine, with much light filthy matter, is worth one or two cents more per bash-el than if cleaned in the common way. There is also a great saving of grain, in straw and chaff over the common way of thrashing and cleaning, and also ever other Separators and Cleaners. The machine is conveniently arranged to habing and threshing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is no thalf the trouble in a barn floor as the common thresher and shaker. It is also easily put in operation, being simple, easily managed, relia-ble, durable, compact, and cleanly to work by while in operation, not making near the dust as the com-mon machine or ot ter Separators. As Kunkels Bitter Wine of Iron is the only sure and effectual remedy in the known world for the permanent cure of *Dyspepsia and Debility*, and as there are a number of imitations offered to the pub-lic, we would caution the community to purchase none but the genuine article, manufactured by S. A. KUNKEL & BRO., and has their stamp on the top of the cork of every bottle. The very fact that others are attempting to imitate this valuable remedy, proves its worth and speaks volumes in its favor.

For ners can rest assured that this machine is no humbug, and judging from the high recommendation from farmers that are using them, I must come to the conclusion that it is the very machine that farmers want and will have as soon as they have an opportunity to appreciate and attest its merits, which I hope they will give me an opportunity, as I am willing to be responsible, as already stated, Price of Machine at Shop, (all complete, ready to attach to belt Lever or Railway Power,)

\$1,75 cash, \$180 in three months, with interest from date.

As material for manufacturing advances, there may be a corresponding advance in the price of ma-chines. The machine is fully represented in the above cut. I warrant the machine to do as above represented. Orders solicited and promptly attended to. The machine is manufactured in Pennsylvania and Maryland, at different shops.
