National Debts and U. S. Stocks.

The creation of national debts is not a modern improvement, but the ability of a great nation to provide for a great debt, and to make it the most convenient and best form of personal property, is a modern wonder.-The debt of Great Britain was begun by raising a million sterling by loan in 1692, and terminated, the debt had reached fifty millions. Many statesmen and economists were then alarmed at the great burden which had been imposed upon the industry of the country, but when the war of the Austrian succession had swelled this amount to eighty millions, Macaulay says that historians and orators pronounced the case to be desperate. But when war again broke out, and the national debt was rapidly carried up to one hundred and forty millions, men of theory and business both pronounced that the fatal day had certainly arrived. David Hume said that, although, by taxing its energies to the utmost, the country might possibly live through it, the experiment must never be repeated,-even a small increase might be fatal. Granville said the nation must sink under it unless some portion of the load was borne by the American Colonies, and the attempt to impose this load produced the war of the revolution, and, instead of aiminishing, added another hundred millions to the burden. Again, says Macaulay, was England given over, but again she was more prosperous than ever before. But when at the close of her Napoleonic wars in 1816, this debt had been swelled up to the enormous sum of ELDEN, successors to J. But in the very face of this mountain of obligation,-to say nothing of her vast colonial debt is now a charge of but 121 per cent. ain paying her debt, we shall do, and more, with ours. We have vast territories untouched by the plow, mines of all precious

metals of which we have hardly opened the doors, a population full of life, energy, enterprise and industry, and the accumulated wealth of money and labor of the old countries pouring into the lap of our giant and ever-to-be-united republic.
