Farmers will please look at the great advantage in Thrashing Grain with

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR CLEANER AND BAGGER.

At a time like the present, when labor is very scarce, it is important that farmers who are interested should give attention to the above improvement, which will considerably reduce the expense of threshing

grain over the common way.

This machine has been before the public for a number of years, but not very widely circulated, al though it has competed with all the best of the different patented Grain Separators, and proved a decided advantage, and now has the reputation of being the best Separator ever before the public. In order to prove this in new neighborhoods where it is not known, I am willing to forward a machine for a test to any person desiring a trial, and have its merits tested; and I wish to have it understood that I put the

to any person desiring a trial, and have its merits tested; and I wish to have it understood that I put the machine upon its own merits, and want farmers to judge for themselves: If it does not fully meet their wants and they do not wish to purchase, I am perfectly willing to over all expenses of shipping.

The machine is particularly adapted to farmers for their own use, and will apply to lever or railway power, will thresh and clean, in good grain, from 100 to 150 bushels per day, using four to six horses and the same number hands, but under very favorable circumstances will thresh more per day.

It cleans the grain thoroughly clean by one operation, which is not generally done by other Separators. Grain cleaned on this machine, with much light filthy matter, is worth one or two cents more per bushel than if cleaned in the common way. There is also a great saving of grain, in straw and chaff over the common way of thrashing and cleaning, and also ever other Separators and Cleaners.

The machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily move of shift it about, so that it is not half the trouble in a barn floor as the common thresher and shaker. It is also easily put in operation, being simple, easily managed, reliable, durable, compact, and cleanly to work by while in operation, not making near the dust as the common machine or of ter Separators.

mon machine or other Separators. Far ners can rest assured that this machine is no humbug, and judging from the high recommendation none but the genuine article, manufactured by S. A. KUNKEL & Bro., and has their stamp on the top of the cork of every bottle. The very fact that others are attempting to imitate this valuable remedy, proves its worth and speaks volumes in its favor.

The Bitter Wine of Iron is put up in 75 cent and

As material for manufacturing advances, there may be a corresponding advance in the price of ma

The machine is fully represented in the above cut.

I warrant the machine to do as above represented. Orders solicited and promptly attended to.

The machine is manufactured in Pennsylvania and Maryland, at different shops. For further information and description of machine, address
