Improved Thrashing Machine!

Farmers will please look at the great advantage in Thrashing

GEISERS' PATENT SELF-REGULATING GRAIN SEPARATOR

CLEANER AND BAGGER.

At a time like the present, when labor is very scarce, it, is important that farmers who are interested should give attention to the above improvement, which will considerably reduce the expense of threshing grain over the common wav.

This machine has been before the public for a number of years, but not very widely circulated, although it has competed with all the best of the different patented Grain Separators, and proved a decided advantage, and now has the reputation of being the best Separator ever before the public. In order to prove this in new neighborhoods where it is not known, I am willing to forward a machine for a test to the Company is some 30 barrels per day.

2d, One acre of ground in Plumer, Venango machine upon its own merits, and want farmers to judge for themselves. If it does not fully meet their wants and they do not wish to purchase, I am perfectly willing to bear all expenses of shipping.

The machine is particularly adapted to farmers for their own use, and will apply to lever or railway

power, will thresh and clean, in good grain, from 100 to 150 bushels per day, using four to six horses and the same number hards, but under very favorable circumstances will thresh more per day. It cleans the grain thoroughly clean by one operation, which is not generally done by other Separators. Grain cleaned on this machine, with much light filthy matter, is worth one or two cents more per bushel than if cleaned in the common way. There is also a great saving of grain, in straw and chaff over the common way of thrashing and cleaning, and also over other Separators and Cleaners.

The machine is conveniently arranged for hauling and threshing, being permanently fixed on two wheels. One man can easily move or shift it about, so that it is not half the trouble in a barn floor as the "Geary Farm." Parties the common thresher and shaker. It is also easily put in operation, being simple, easily managed, reliate about leasing wells on this property. ble, durable, compact, and cleanly to work by while in operation, not making near the dust as the common machine or of ter Separators.

For ners can rest assured that this machine is no humbug, and judging from the high recommendation

Far ners can rest assured that this machine is no humbug, and judging from the high recommendation of an increase in a short time, this prospectus is from farmers that are using them, I must come to the conclusion that it is the very machine that farmers herewith submitted to the public without further want and will have as soon as they have an opportunity to appreciate and attest its merits, which I hope they will give me an opportunity, as I am willing to be responsible, as already stated, Price of Machine at Shop, (all complete, ready to attach to belt Lever or Railway Power,) \$1,75 cash, \$180 in three months, with interest from date.

As material for manufacturing advances, there may be a corresponding advance in the price of ma chines. The machine is fully represented in the above cut.

I warrant the machine to do as above represented. Orders solicited and promptly attended to.

The machine is manufactured in Pennsylvania and Maryland, at different shops. For further information and description of machine,
