NEW SKIRT FOR 1866.

The Great Invention of the Age in HOOP SKIRTS.

J. W. BRADLEY'S New Patent DUPLEX ELLIPTIC (or double) SPRING SKIRT.

THIS INVENTION consists of DUPLEX (or two) ELASTIC PUFF REFINED STEEL SPRINGS, ingeniously BRAIDED TOGETHER and FIRMLY JOINED, SOON TO BE MADE, making the TOUGHEST, MOST FLEXIBLE, ELASTIC and DURABLE Spring ever used. They seldom bend or BREAK, like the Single Springs, and consequently preserve their perfect and beautiful shape more than twice as long as any Single Spring Skirt that ever Has or Can be made.

THE wonderful flexibility and great comfort and pleasure to any Lady wearing the Duplex Elliptic Skirt will be experienced particularly in all crowded Assemblies, Operas, Carriages, Railroad Cars, Church Pews, Arm Chairs, for Promenade and House Dress, as the Skirt can be folded when in use to occupy a small space as easily and conveniently as a Silk or Muslin Dress.

A Lady having enjoyed the Pleasure, Comfort and Great Convenience of wearing the Duplex Elliptic Steel Spring Skirt for a single day will never afterwards willingly dispense with their use. For Children, Misses and Young Ladies they are superior to all others.

THE HOOPS are covered with 2 ply double twisted thread and will wear twice as long as the Single yarn covering which is used on all Single Steel Hoop Skirts. The three bottom rods of every skirt are also double steel, and twice or threefold covered to prevent the covering from wearing off the rods when dragging down stairs stone steps, etc., etc., which they are constantly subject to when in use.

All are made of the new and elegant Corled Tapes, and are the best quality in every part, giving to the wearer the most graceful and perfect shape possible, and are unquestionably the lightest, most desirable, comfortable and economical skirt ever made.
